FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2017

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 001-36794

The Chemours Company

(Exact Name of Registrant as Specified in Its Charter)

Delaware

(State or other Jurisdiction of
Incorporation or Organization)

46-4845564

(I.R.S. Employer
Identification No.)

1007 Market Street, Wilmington, Delaware 19899

(Address of Principal Executive Offices)

(302) 773-1000

(Registrant's Telephone Number)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that registrant was required to submit and post such files.) Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):

Large Accelerated Filer

Non-Accelerated Filer

Accelerated Filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined by Rule 12b-2 of the Exchange Act). Yes No

The Registrant had 184,463,611 shares of common stock, \$0.01 par value, outstanding at April 28, 2017.

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

Note 1. Basis of Presentation

The accompanying interim consolidated financial statements have been prepared in accordance with generally accepted accounting principles in the United States of America (GAAP) for interim financial information. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair statement of the results for interim periods have been included. Results for interim periods should not be considered indicative of results for a full year and the year-end consolidated balance sheet does not include all disclosures required by GAAP. As such, these interim consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

Unless the context otherwise requires, references herein to "The Chemours Company", "Chemours", "the Company", "our company", "we", "us", and "our" refer to The Chemours Company and its consolidated subsidiaries. References herein to "DuPont" refer to E.I. du Pont de Nemours and Company, a Delaware corporation, and its consolidated subsidiaries (other than Chemours and its consolidated subsidiaries), unless the context otherwise requires.

Note 2. Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board (FASB) issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)". The objective of this standard update is to remove inconsistent practices with regard to revenue recognition between US GAAP and IFRS. The standard intends to improve comparability of revenue recognition practices across entities, industries, jurisdictions and capital markets. The provisions of ASU No. 2014-09 will be effective for interim and annual periods beginning after December 15, 2017, with early adoption permitted for annual periods beginning after December 15, 2016. The Company plans to adopt ASU 2014-09 as of January 1, 2018. Subsequent to the issuance of ASU No. 2014-09, the FASB has issued multiple updates in connection with Topic 606. These updates affect the guidance contained within ASU 2014-09 and will be assessed as part of the Company's revenue recognition project plan.

The Company's project plan includes a three-phase approach to implementing this standard update. Phase one, the assessment phase, was completed in the first quarter of 2017. In connection with this initial phase, the Company performed the following activities: conducted internal surveys of its businesses, held revenue recognition workshops with sales and business unit finance leadership, and reviewed a representative sample of revenue arrangements across all businesses to initially identify a set of applicable qualitative revenue recognition changes related to the new standard update. The Company is now entering its second phase of the project, where the objectives will be to establish and document key accounting policies, assess new disclosure requirements, business process and control impacts, and determine an initial quantitative impact resulting from the new standard update. Phase two is expected to be completed in the second quarter of 2017. Lastly, phase three's objectives will comprise of effectively implementing the new standard update and embedding the new accounting treatment into the Company's business processes and controls to support the financial reporting requirements. Phase three is expected to be completed in the fourth quarter of 2017.

The Company is still evaluating the impact that the new standard will have on the Company's consolidated financial statements and will be unable to quantify its impact until the third phase of the project has been completed. The method of adoption has also not yet been determined and is not expected to be finalized until the second phase of the project plan has been completed.

In August 2016, the FASB issued various updates to the Accounting Standards Update (ASU) 2016-15, "Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments", which clarifies and amends certain cash receipts and cash payments presentation and classification in the statement of cash flows. The guidance is effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The amendments should be applied using a retrospective transition method (unless impractical to do so) to each period presented and earlier application is permitted. Chemours is currently evaluating the impact of adopting this guidance but does not expect the adoption will have a significant impact on its cash flows.

In March 2017, the FASB issued ASU No. 2017-07, "Compensation – Retirement Benefits (Topic 715)", which requires that employers offering their employees defined benefit pension plans disaggregate the service cost component from other components of net benefit cost. The amendments also provide explicit guidance on how to present the service cost component and the other components of net benefit cost in the income statement and allow only the service cost component of net benefit cost to be eligible for capitalization. The guidance is effective for public business entities for annual periods beginning after December 15, 2017, as well as interim periods within those annual periods. The amendments in this update should be applied retrospectively for the presentation of

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

the service cost component and the other components of net periodic pension cost and net periodic postretirement benefit cost in the income statement and prospectively for the capitalization of the service cost component of net periodic pension cost and net periodic postretirement benefit in assets. Early adoption is permitted within the first interim period of an annual period for which financial statements have not been issued or made available for issuance. Chemours is currently evaluating the impact of adopting this guidance but does not expect the adoption will have a significant impact on its results of operations. The adoption is not expected to have any impact on the Company's financial position or cash flows.

In February 2016, the FASB issued ASU No. 2016-02, "Leases (Topic 842)", which supersedes the leases requirements in Topic 840. The core principle of Topic 842 is that a lessee should recognize on the balance sheet the lease assets and lease liabilities that arise from all lease arrangements with terms greater than 12 months. Recognition of these lease assets and lease liabilities represents an improvement over previous GAAP, which did not require lease assets and lease liabilities to be recognized for operating leases. Qualitative disclosures along with specific quantitative disclosures will be required to provide enough information to supplement the amounts recorded in the financial statements so that users can understand more about the nature of an entity's leasing activities. Lessees and lessors are required to recognize and measure leases at the beginning of the earliest period presented using a modified retrospective approach, which includes a number of optional practical expedients that entities may elect to apply. The amendments in this update are effective for the Company's fiscal year beginning January 1, 2019, including interim periods within that fiscal year. Early application of the amendments in this update is permitted for all entities. At adoption, the Company will recognize a right-of-use asset and a lease liability initially measured at the present value of its operating lease payments. The Company is currently evaluating the other impacts of adopting this guidance on its financial position, results of operations and cash flows.

Recently Adopted Accounting Guidance

In March 2016, the FASB issued ASU No. 2016-09, "Compensation - Stock Compensation (Topic 718)". The update sets forth areas for simplification within several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The amendments in this update are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016. Chemours adopted this guidance effective January 1, 2017 and the adoption did not have a significant impact on the Company's financial position, results of operations and cash flows except for the impact of windfall income tax benefits. We expect the guidance will cause volatility in the Company's income tax rates going forward. As of the adoption date, there were no windfall tax benefits from prior periods recognized; therefore prior period adjustments were not required under a modified retrospective basis. In the first quarter of 2017, Chemours recognized approximately \$10 of windfall tax benefits primarily from significant options exercised and RSUs vested during the period, which were included in the provision for income taxes for the period ended March 31, 2017.

In January 2017, the FASB issued ASU No. 2017-04, "Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment", which eliminates the requirement to determine the fair value of individual assets and liabilities of a reporting unit to measure goodwill impairment. Under the amendments, goodwill impairment testing will be performed by comparing the fair value of the reporting unit with its carrying amount and recognizing an impairment charge for the amount by which the carrying amount exceeds the reporting unit's fair value, but not to exceed the total amount of goodwill allocated to the reporting unit. The guidance is effective for annual and interim goodwill impairment tests in fiscal years beginning after December 15, 2019, and should be applied on a prospective basis. Early adoption is permitted for annual or interim goodwill impairment testing performed after January 1, 2017. The Company has adopted this guidance and will implement its provisions for annual and interim goodwill impairment tests performed prospectively.

Note 3. Restructuring and Asset-Related Charges, Net

For the three months ended March 31, 2017 and 2016, Chemours recorded charges for restructuring and asset-related charges as follows:

	Three Months Ended March 31,	
	2017	2016
Restructuring Related Charges:		
Employee Separation Charges	\$ —	\$ 4
Decommissioning and other charges, net	12	13
Total restructuring charges, net	<u>\$ 12</u>	<u>\$ 17</u>

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

The charges related to the restructuring programs impacted segment earnings for the three months ended March 31, 2017 and 2016 as follows:

	Three Months Ended March 31,	
	2017	2016
Plant and product line closures ¹		
Titanium Technologies	\$ 4	\$ 8
Fluoroproducts	3	4
Chemical Solutions	5	1
Sub-total	<u>12</u>	<u>13</u>
2015 Global restructuring		
Titanium Technologies	—	2
Fluoroproducts	—	2
Chemical Solutions	—	—
Sub-total	<u>—</u>	<u>4</u>
Total	<u>\$ 12</u>	<u>\$ 17</u>

¹ Includes charges related to employee separation, decommissioning and dismantling costs, and asset-related charges in connection with the restructuring activities.

Plant and product line closures

In the Titanium Technologies segment, due to the closure of the Edge Moor, Delaware manufacturing plant in the U.S., the Company recorded decommissioning and dismantling related charges of approximately \$4 and \$8 for the three months ended March 31, 2017 and 2016, respectively. The Company completed all actions related to these restructuring activities and sold the site during the first quarter of 2017. Cumulative amount incurred, excluding non-cash asset charges, in connection with the Edge Moor plant closure was approximately \$60.

Also, in the Fluoroproducts segment, the Company recorded additional decommissioning and dismantling related charges for certain of its production lines in the U.S. of approximately \$3 and \$4 for the three months ended March 31, 2017 and 2016, respectively. To date, the Company incurred in aggregate approximately \$16 of restructuring costs, excluding non-cash asset charges. As of March 31, 2017, the Company has substantially completed the actions related to the restructuring activities initiated in 2015.

Further, in the Chemicals Solutions segment, following the production shutdown of our Reactive Metals Solutions manufacturing plant at Niagara Falls, New York in September 2016, the Company immediately began decommissioning the plant. As a result, for the three months ended March 31, 2017, the Company recorded approximately \$5 of decommissioning and dismantling related charges. To date, the Company incurred in aggregate approximately \$21 of restructuring costs, excluding non-cash asset charges. Additional restructuring charges of approximately \$5 for decommissioning and site redevelopment are expected to be incurred in 2017, which will be expensed as incurred.

The following table shows the change in the employee separation related liability account associated with the restructuring programs:

	Titanium Technologies Site Closures	Fluoroproducts Lines Shutdown	Chemical Solutions Site Closures	2015 Global Restructuring	Total
Balance as of December 31, 2016	\$ 4	\$ 1	\$ 8	\$ 21	\$ 34
Charges to income for the three months ended March 31, 2017	—	—	—	—	—
Charges to liability accounts:					
Payments	(1)	(1)	(1)	(9)	(12)
Net currency translation and other adjustment ¹	(1)	—	—	1	—
Balance as of March 31, 2017	<u>\$ 2</u>	<u>\$ —</u>	<u>\$ 7</u>	<u>\$ 13</u>	<u>\$ 22</u>

¹ Amounts include net currency translation adjustment of less than \$1 for the periods presented and rounding difference.

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

As of March 31, 2017, there are no significant outstanding liabilities related to decommissioning and other restructuring related charges.

Note 4. Other Income, Net

	Three Months Ended March 31,	
	2017	2016
Leasing, contract services and miscellaneous income	\$ 8	\$ 7
Royalty income ¹	5	3
Gain on sale of assets and businesses ²	16	89
Exchange gains (losses), net ³	5	(6)
Total other income, net	\$ 34	\$ 93

¹ Royalty income is primarily from technology and trademark licensing.

² For the three months ended March 31, 2017, gain on sale includes a gain on sale of the Edge Moor site of approximately \$12 and other land sale. The three months ended March 31, 2016 represents a gain on sale of the aniline facility in Beaumont, Texas to the Dow Chemical Company ("Dow"). The transaction closed on March 1, 2016 and Chemours received \$140 from Dow.

³ Exchange gains (losses), net includes gains and losses on foreign currency forward contracts. See Note 14 for additional information.

Note 5. Income Taxes

For the three months ended March 31, 2017 and 2016, Chemours recorded a provision for income tax of \$22 and \$19, respectively, resulting in an effective income tax rate of approximately 13% and 27%, respectively. The income tax provision for the quarter ended March 31, 2017 is inclusive of a \$10 income tax benefit from stock option windfalls in accordance with the recently adopted guidance discussed in Note 2. The income tax provision for the quarter ended March 31, 2016 is inclusive of \$34 income tax expense related to fixed asset sales that took place during the quarter. The remaining change in the effective tax rate from the prior year is primarily due to the Company's geographical mix of earnings as well as the impact of the valuation allowance on U.S. foreign tax credits, from which the Company does not expect to benefit in 2017.

Each year, Chemours and/or its subsidiaries file income tax returns in the U.S. federal jurisdiction and various states and non-U.S. jurisdictions. These tax returns are subject to examination and possible challenge by the taxing authorities. Positions challenged by the taxing authorities may be settled or appealed by Chemours. As a result, income tax uncertainties are recognized in Chemours' interim consolidated financial statements in accordance with accounting for income taxes, when applicable. Although it is difficult to predict the timing, the Company estimates that approximately \$6 of unrecognized income tax benefits, excluding the impact relating to accrued interest and penalties, could be resolved within the next twelve months as a result of an accounting method change request filed with the Internal Revenue Service in the fourth quarter of 2016. We are not aware of any other matters that would result in significant changes to the amount of unrecognized income tax benefits reflected in the Interim Consolidated Balance Sheet as of March 31, 2017.

For the year ended December 31, 2016, the Company established a valuation allowance against its U.S. foreign tax credits. The Company regularly monitors positive and negative evidence that may change the most recent assessment of the Company's ability to realize a benefit from these deferred tax assets. The Company continues to maintain a valuation allowance against net deferred tax assets related to the foreign tax credit of \$55 and \$50 at March 31, 2017 and December 31, 2016, respectively.

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

Note 6. Earnings Per Share of Common Stock

The table below shows a reconciliation of the numerator and denominator for basic and diluted earnings per share calculations for the periods indicated.

	Three Months Ended March 31,	
	2017	2016
Numerator:		
Net income attributable to Chemours	\$ 150	\$ 51
Denominator:		
Weighted average number of common shares outstanding- Basic	183,408,309	181,281,166
Dilutive effect of the Company's employee compensation plans ¹	5,741,621	221,974
Weighted average number of common shares outstanding - Diluted ¹	<u>189,149,930</u>	<u>181,503,140</u>

¹ Diluted earnings per share is calculated using net income available to common shareholders divided by diluted weighted-average shares of common shares outstanding during each period, which includes unvested restricted shares. Diluted earnings per share considers the impact of potentially dilutive securities except in periods in which there is a loss because the inclusion of the potential common shares would have an antidilutive effect.

The following average number of stock options were antidilutive and, therefore, were not included in the diluted earnings per share calculation:

	Three Months Ended March 31,	
	2017	2016
Average number of stock options	169,118	8,701,474

Note 7. Accounts and Notes Receivable – Trade, Net

	March 31, 2017	December 31, 2016
Accounts receivable—trade, net ¹	\$ 840	\$ 742
VAT, GST and other taxes ²	61	46
Other receivables ³	20	19
Total	<u>\$ 921</u>	<u>\$ 807</u>

¹ Accounts receivable – trade, net includes trade notes receivable and is net of allowances of \$5 as of March 31, 2017 and December 31, 2016. Allowances are equal to the estimated uncollectible amounts.

² Value Added Tax (VAT) and Goods and Services Tax (GST).

³ Other receivables consist of advances and other deposits.

Accounts and notes receivable are carried at amounts that approximate fair value. Bad debt expense was less than \$1 for the three months ended March 31, 2017 and 2016.

Note 8. Inventories

	March 31, 2017	December 31, 2016
Finished products	\$ 568	\$ 532
Semi-finished products	150	150
Raw materials, stores and supplies	304	285
Subtotal	1,022	967
Adjustment of inventories to LIFO basis	(200)	(200)
Total	<u>\$ 822</u>	<u>\$ 767</u>

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

Inventory values, before LIFO adjustment, are generally determined by the average cost method, which approximates current cost. Inventories are valued under the LIFO method at substantially all of the U.S. locations, which comprised \$459 and \$465 or 45% and 48% of inventories before the LIFO adjustments at March 31, 2017 and December 31, 2016, respectively. The remainder of inventory held in international locations and certain U.S. locations is valued under the average cost method.

Note 9. Property, Plant and Equipment

Depreciation expense amounted to \$70 and \$65 for the three months ended March 31, 2017 and 2016, respectively. Property, plant and equipment includes gross assets under capital leases of \$5 at March 31, 2017 and \$5 at December 31, 2016.

Note 10. Other Assets

	March 31, 2017	December 31, 2016
Capitalized repair and maintenance costs	\$ 126	\$ 145
Pension assets ¹	180	159
Deferred income taxes	45	41
Asset held for sale	29	29
Miscellaneous ²	40	43
Total	<u>\$ 420</u>	<u>\$ 417</u>

¹ Pension assets represent the funded status of certain of the Company's long-term employee benefit plans.

² Miscellaneous includes deferred financing fees related to the Revolving Credit Facility of \$12 and \$13 as of March 31, 2017 and December 31, 2016, respectively, and company-owned life insurance policies on former key executives of a U.S. subsidiary. The life insurance policies had a cash surrender value of \$61 at March 31, 2017 and December 31, 2016, which are presented net of \$61 in outstanding loans from the policy issuer.

Asset Held for Sale

In December 2016, in connection with a sale agreement entered into in January 2017 to sell the Company's corporate headquarters building located in Wilmington, Delaware, the Company recorded an approximately \$13 pre-tax impairment charge and classified the net book value of the building as asset held for sale for the year ended December 31, 2016. The Company completed the sale in April 2017 for gross proceeds of \$32. In connection with the sale, Chemours also entered into lease agreements to lease back a portion of the building beginning in April 2017. No significant gain or loss is expected to be recognized as a result of the sale and leaseback transaction.

Note 11. Other Accrued Liabilities

	March 31, 2017	December 31, 2016
Compensation and other employee-related costs	\$ 101	\$ 154
Employee separation costs ¹	21	31
Accrued litigation ²	347	344
Environmental remediation ²	74	71
Income taxes	40	39
Customer rebates	44	53
Deferred revenue ³	23	76
Accrued interest	58	21
Miscellaneous ⁴	72	83
Total	<u>\$ 780</u>	<u>\$ 872</u>

¹ Current portion of employee separation costs. See Note 3 for further information.

² Current portions of accrued litigation and environmental remediation. Accrued litigation includes a \$335 litigation accrual related to the PFOA MDL Settlement. See Note 13 for further discussion of accrued litigation and environmental remediation.

³ Deferred revenue as of March 31, 2017 and December 31, 2016, includes \$15 and \$58 outstanding prepayment by DuPont, respectively, for specified goods and services, which Chemours expects to provide through mid-2017.

⁴ Miscellaneous primarily includes accrued utility expenses, property taxes, an accrued indemnification liability, asset retirement obligations and other miscellaneous expenses.

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

Note 12. Debt

Long-term debt was comprised of the following at March 31, 2017 and December 31, 2016:

	March 31, 2017	December 31, 2016
Long-term debt:		
Senior secured term loan	\$ 1,369	\$ 1,372
Senior unsecured notes:		
6.625% due May 2023	1,158	1,158
7.00% due May 2025	750	750
6.125% due May 2023 (€295 at March 31, 2017 and December 31, 2016)	318	308
Capital lease obligations	3	3
Total	3,598	3,591
Less: Unamortized issue discount on senior secured term loan	5	5
Less: Unamortized debt issuance costs	41	42
Less: Current maturities of long-term debt	14	15
Long-term debt, net	<u>\$ 3,538</u>	<u>\$ 3,529</u>

Senior Secured Credit Facilities

The credit agreement, as amended, provided for a seven-year senior secured term loan (the “Term Loan”) and a five-year \$750 senior secured revolving credit facility (the “Revolving Credit Facility”). The proceeds of any loans made under the Revolving Credit Facility can be used for capital expenditures, acquisitions, working capital needs and other general corporate purposes. No borrowings were outstanding under our Revolving Credit Facility. Chemours had \$123 and \$132 in letters of credit issued and outstanding under this facility at March 31, 2017 and December 31, 2016, respectively. The Revolving Credit Facility bears variable interest of a range based on our total net leverage ratio between (a) 0.50% and 1.25% spread for base rate loans and (b) 1.50% and 2.25% spread for LIBOR loans. The applicable margins were 1.00% for base rate loans and 1.75% for LIBOR loans as of March 31, 2017. In addition, we are required to pay a commitment fee on the average daily unused amount of the Revolving Credit Facility at a rate based on our total net leverage ratio, between 0.20% and 0.35%. As of March 31, 2017, commitment fees were assessed at a rate of 0.25%. The Term Loan bears interest at a rate of LIBOR plus 3.00% with a 0.75% LIBOR floor. The effective interest rate on the Term Loan for the quarter ended March 31, 2017 was approximately 3.78%.

On April 3, 2017, the Company completed an amendment (the “April 2017 Amendment”) to its credit agreement, which provides for a new class of term loans, denominated in Euros, in an aggregate principal amount of €400 (the “Euro Term Loan”), and a new class of term loans, denominated in dollars, in an aggregate principal amount of \$940 (the “Dollar Term Loan”, and, collectively with the Euro Term Loan, the “New Term Loans”). The New Term Loans replaced in full the existing Term Loan (the “Existing Term Loan”) outstanding as of March 31, 2017. The New Term Loans mature on May 12, 2022, which is the same maturity date of the Existing Term Loans. The Euro Term Loan bears a variable interest rate equal to EURIBOR plus 2.25% subject to a EURIBOR floor of 0.75% and the Dollar Term Loan bears a variable interest rate equal to LIBOR plus 2.50% subject to a LIBOR floor of 0.00%. The April 2017 Amendment also modifies certain provisions of the credit agreement, including increasing certain incurrence limits to allow further flexibility for the Company. All other provisions, including financial covenants, remain unchanged. No incremental debt was issued as a result of the April 2017 Amendment, although the Euro Term Loan will be subject to remeasurement gains or losses. The Company expects to record approximately \$3 of loss on debt extinguishment and related fees in the second quarter of 2017.

The credit agreement contains financial covenants which, solely with respect to the Revolving Credit Facility as amended, require Chemours not to exceed a maximum senior secured net leverage ratio of 3.50 to 1.00 each quarter through December 31, 2016, 3.00 to 1.00 through June 30, 2017 and further decreasing by 0.25 to 1.00 every subsequent six months to 2.00 to 1.00 by January 1, 2019 and thereafter. Chemours is also required to maintain a minimum interest coverage ratio of 1.75 to 1.00 each quarter through June 30, 2017 and further increasing by 0.25 to 1.00 every subsequent six months to 3.00 to 1.00 by January 1, 2019 and thereafter. In addition, the credit agreement contains customary affirmative and negative covenants that, among other things, limit or restrict Chemours and its subsidiaries’ ability, subject to certain exceptions, to incur liens, merge, consolidate or sell, transfer or lease assets, make investments, pay dividends, transact with subsidiaries and incur indebtedness. The credit agreement also contains customary representations and warranties and events of default. Chemours was in compliance with its debt covenants as of March 31, 2017.

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

Maturities

Chemours has required quarterly principal payments related to the senior secured term loan equivalent to 1.00% per annum through March 2022, with the balance due at maturity. Term loan principal maturities, as amended, over the next five years are \$10 for the remainder of 2017 and \$14 in each year from 2018 to 2021. Debt maturities related to the Term Loan and the senior unsecured notes (the “Notes”) in 2022 and beyond will be \$3,529.

In addition, following the end of each fiscal year commencing on the year ended December 31, 2016, the Company is also required to make additional principal repayments, depending on leverage levels as defined in the credit agreement, equivalent to up to 50% of excess cash flow based on certain leverage targets with stepdowns to 25% and 0% as actual leverage decreases to below 3.00 to 1.00 leverage target. No principal repayments were required to be made in the first quarter of 2017 based upon the December 31, 2016 excess cash flow determined under the credit agreement.

Debt Fair Value

The fair values of the Term Loans, the 2023 Notes, the 2025 Notes and the Euro Notes at March 31, 2017 were approximately \$1,380, \$1,227, \$803 and \$340, respectively. The estimated fair values of the Term Loans and the Notes are based on quotes received from third party brokers, and are classified as Level 2 in the fair value hierarchy.

Note 13. Commitments and Contingent Liabilities

Litigation

In addition to the matters discussed below, Chemours, by virtue of its status as a subsidiary of DuPont prior to the separation, is subject to or required under the separation-related agreements executed prior to the separation to indemnify DuPont against various pending legal proceedings arising out of the normal course of the Chemours business including product liability, intellectual property, commercial, environmental and antitrust lawsuits. It is not possible to predict the outcome of these various proceedings. Except for the PFOA litigation for which a separate assessment is provided in this Note 13, while management believes it is reasonably possible that Chemours could incur losses in excess of the amounts accrued, if any, for the aforementioned proceedings, it does not believe any such loss would have a material impact on Chemours’ consolidated financial position, results of operations or liquidity. With respect to the litigation matters discussed below, including PFOA multi-district litigation (“MDL”), management’s estimate of the probability of loss in excess of the amounts accrued, if any, is addressed individually for each matter. In the event that DuPont seeks indemnification for adverse trial rulings or outcomes for any such matter relating to PFOA, these indemnification claims could materially adversely affect Chemours’ financial condition. Disputes between Chemours and DuPont may also arise with respect to indemnification matters, including disputes based on matters of law or contract interpretation. If and to the extent these disputes arise, they could materially adversely affect Chemours.

(a) Asbestos

In the separation, DuPont assigned its asbestos docket to Chemours. At March 31, 2017 and December 31, 2016, there were approximately 1,900 lawsuits pending against DuPont alleging personal injury from exposure to asbestos. These cases are pending in state and federal court in numerous jurisdictions in the U.S. and are individually set for trial. A small number of cases are pending outside the U.S. Most of the actions were brought by contractors who worked at sites between 1950 and the 1990s. A small number of cases involve similar allegations by DuPont employees or household members of contractors or DuPont employees. Finally, certain lawsuits allege personal injury as a result of exposure to DuPont products.

At March 31, 2017 and December 31, 2016, Chemours had an accrual of \$41 related to this matter. Chemours reviews this estimate and related assumptions quarterly. Management believes that the likelihood is remote that Chemours would incur losses in excess of the amounts accrued in connection with this matter.

(b) Benzene

In the separation, DuPont assigned its benzene docket to Chemours. At March 31, 2017 and December 31, 2016, there were 25 and 27 cases pending against DuPont alleging benzene-related illnesses, respectively. These cases consist of premises matters involving contractors and deceased former employees who claim exposure to benzene while working at DuPont sites primarily in the 1960s

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

through the 1980s, and product liability claims based on alleged exposure to benzene found in trace amounts in aromatic hydrocarbon solvents used to manufacture DuPont products, such as paints, thinners and reducers.

Through DuPont, Chemours has received a claim by Phillips66 for indemnity and defense for three matters arising at a former DuPont/Conoco Texas site. Phillips66 seeks reimbursement for its settlement and fees in one matter and assumption of the defense in two matters.

A benzene case (Hood v. DuPont) was tried to a verdict in Texas state court on October 20, 2015. Plaintiffs alleged that Mr. Hood's Acute Myelogenous Leukemia was the result of 24 years of occupational exposure to trace benzene found in DuPont automotive paint products and that DuPont negligently failed to warn him that its paints, reducers and thinners contained benzene that could cause cancer or leukemia. The jury found in the Plaintiffs favor awarding \$6.9 in compensatory damages and \$1.5 in punitive damages. In March 2016, acting on the Company's motion, the Court struck the punitive award. Through DuPont, Chemours has filed an appeal on the remaining award based upon substantial errors made at the trial court level. Plaintiffs have filed a cross appeal.

Management believes that a loss is reasonably possible related to these matters; however, given the evaluation of each benzene matter is highly fact driven and impacted by disease, exposure and other factors, a range of such losses cannot be reasonably estimated at this time.

(c) PFOA

Prior to the fourth quarter of 2014, the performance chemicals segment of DuPont made PFOA (collectively, perfluorooctanoic acids and its salts, including the ammonium salt) at its Fayetteville plant (Fayetteville, North Carolina) and used PFOA as a processing aid in the manufacture of fluoropolymers and fluoroelastomers at certain sites including: Washington Works (Parkersburg, West Virginia), Chambers Works (Deepwater, New Jersey), Dordrecht Works (Netherlands), Changshu Works (China), and Shimizu (Japan). These sites are now owned and/or operated by Chemours.

Chemours recorded accruals of \$351 and \$349 related to the PFOA matters discussed below at March 31, 2017 and December 31, 2016, respectively. In the fourth quarter of 2016, the Company recorded an approximately \$335 accrual related to the PFOA MDL settlement, which is further discussed below.

The accruals also include charges related to DuPont's obligations under agreements with the U.S. Environmental Protection Agency (EPA) and voluntary commitments to the New Jersey Department of Environmental Protection (NJDEP). These obligations and voluntary commitments include surveying, sampling and testing drinking water in and around certain company sites offering treatment or an alternative supply of drinking water if tests indicate the presence of PFOA in drinking water at or greater than the national Health Advisory. A provisional health advisory level was set in 2009 at 0.4 parts per billion (ppb) that includes PFOA in drinking water. In May 2016, the EPA announced a health advisory level of 0.07 ppb that includes PFOA in drinking water. As a result, we recorded an additional \$4 in the second quarter of 2016 based on management's best estimate of the impact of the new health advisory level on the company's obligations to the EPA, which have expanded the testing and water supply commitments previously established. Based on prior testing, the Company has initiated additional testing and treatment in certain additional locations in and around Chambers Works and Washington Works plants. The Company will continue to work with the EPA regarding the extent of work that may be required with respect to these matters.

Drinking Water Actions

In August 2001, a class action, captioned Leach v. DuPont, was filed in West Virginia state court alleging that residents living near the Washington Works facility had suffered, or may suffer, deleterious health effects from exposure to PFOA in drinking water.

DuPont and attorneys for the class reached a settlement in 2004 that binds about 80,000 residents. In 2005, DuPont paid the plaintiffs' attorneys' fees and expenses of \$23 and made a payment of \$70, which class counsel designated to fund a community health project. Chemours, through DuPont, funded a series of health studies which were completed in October 2012 by an independent science panel of experts (the C8 Science Panel). The studies were conducted in communities exposed to PFOA to evaluate available scientific evidence on whether any probable link exists, as defined in the settlement agreement, between exposure to PFOA and human disease. The C8 Science Panel found probable links, as defined in the settlement agreement, between exposure to PFOA and pregnancy-induced hypertension, including preeclampsia, kidney cancer, testicular cancer, thyroid disease, ulcerative colitis and diagnosed high cholesterol.

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

In May 2013, a panel of three independent medical doctors released its initial recommendations for screening and diagnostic testing of eligible class members. In September 2014, the medical panel recommended follow-up screening and diagnostic testing three years after initial testing, based on individual results. The medical panel has not communicated its anticipated schedule for completion of its protocol. Through DuPont, Chemours is obligated to fund up to \$235 for a medical monitoring program for eligible class members and, in addition, administrative cost associated with the program, including class counsel fees. In January 2012, Chemours, through DuPont, put \$1 in an escrow account to fund medical monitoring as required by the settlement agreement. The court-appointed Director of Medical Monitoring has established the program to implement the medical panel's recommendations and the registration process, as well as eligibility screening, is ongoing. Diagnostic screening and testing is on-going and associated payments to service providers are being disbursed from the escrow account. As of March 31, 2017, less than \$1 has been disbursed from the escrow account related to medical monitoring. While it is probable that the Company will incur costs related to the medical monitoring program discussed above, such costs cannot be reasonably estimated due to uncertainties surrounding the level of participation by eligible class members and the scope of testing.

In addition, under the Leach settlement agreement, DuPont must continue to provide water treatment designed to reduce the level of PFOA in water to six area water districts and private well users. At separation, this obligation was assigned to Chemours, which is included in the accrual amounts recorded as of March 31, 2017.

Class members may pursue personal injury claims against DuPont only for those human diseases for which the C8 Science Panel determined a probable link exists. At March 31, 2017 and December 31, 2016, there were approximately 3,500 lawsuits filed in various federal and state courts in Ohio and West Virginia, an increase of approximately 600 over year end 2014. These lawsuits are consolidated in an MDL in Ohio federal court. In the third quarter of 2014, six plaintiffs from the MDL were selected for individual bellwether trials.

Litigation and Procedural Posture Prior to Stay of MDL Litigation

The six bellwether cases in the MDL were tried, resolved, appealed or otherwise addressed. Two bellwether cases were tried to adverse verdicts, and three were settled for confidential amounts well below the incremental cost of preparing for trial and that were individually and in aggregate immaterial to the Company. The final bellwether matter was removed from the bellwether group when it was determined that the plaintiff did not suffer from the alleged disease. Following the bellwethers, an additional case was tried to an adverse verdict and a fourth trial had commenced but was suspended when a settlement of the MDL was reached.

No other claims in the MDL have been settled or resolved during the period presented. Chemours, through DuPont, denies the allegations in these lawsuits and will resume defending the matters vigorously should the settlement not proceed.

Settlement of MDL between DuPont and MDL Plaintiffs

On February 11, 2017, DuPont entered into an agreement in principle with plaintiffs' counsel representing the MDL plaintiffs providing for a global settlement of all cases and claims in the MDL, including all filed and unfiled personal injury cases and claims that are part of the plaintiffs' counsel's claim inventory, as well as cases that have been tried to a jury verdict (the "MDL Settlement"). A final agreement was executed on March 31, 2017. The total settlement amount is \$670.7 million dollars in cash, half of which will be paid by Chemours and half paid by DuPont. DuPont's payment would not be subject to indemnification or reimbursement by Chemours, and Chemours has accrued approximately \$335 million associated with this matter at December 31, 2016. In exchange for payment of the total settlement amount, DuPont and Chemours will receive a complete release of all claims by the settling plaintiffs. The MDL Settlement was entered into solely by way of compromise and settlement and is not in any way an admission of liability or fault by DuPont or Chemours. The MDL Settlement is not subject to court approval; however, the MDL Settlement may not proceed in certain conditions, including a walk-away right that enables DuPont to terminate the MDL Settlement if more than a specified number of plaintiffs determine not to participate. Judicial proceedings related to this action have been stayed pending finalization of the settlement. If the MDL Settlement is terminated or otherwise does not proceed, additional lawsuits may go to trial.

Settlement between DuPont and Chemours related to MDL

DuPont and Chemours have also agreed, subject to and following the completion of the MDL Settlement, to a limited sharing of potential future PFOA liabilities (i.e., "indemnifiable losses", as defined in the separation agreement between DuPont and Chemours) for a period of five years. During that five-year period, Chemours would annually pay future PFOA liabilities up to \$25 million and, if such amount is exceeded, DuPont would pay any excess amount up to the next \$25 million (which payment will not be subject to indemnification by Chemours), with Chemours annually bearing any further excess liabilities under the terms of the separation

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

agreement. After the five-year period, this limited sharing agreement would expire, and Chemours' indemnification obligations under the separation agreement would continue unchanged. Chemours has also agreed that, upon the MDL Settlement becoming effective, it will not contest its liability to DuPont under the separation agreement for PFOA liabilities on the basis of ostensible defenses generally applicable to the indemnification provisions under the separation agreement, including defenses relating to punitive damages, fines or penalties or attorneys' fees, and waives any such defenses with respect to PFOA liabilities. Chemours has, however, retained defenses as to whether any particular PFOA claim is within the scope of the indemnification provisions of the separation agreement.

PFOA Summary

Chemours has accrued \$335 million associated with the MDL Settlement at December 31, 2016. If the MDL Settlement does not proceed, any cases stayed or additional lawsuits may go to trial. An adverse ruling at trial could result in our incurring additional costs and liabilities, which are difficult to estimate beyond accrued amounts and involve significant uncertainty due to the uniqueness of the individual MDL plaintiff's claims and the defenses to those claims, both as to potential liability and damages on an individual claim basis, and numerous unsettled legal issues, among other factors, such as general versus specific causation, lack of specific fact discovery allowed to date on vast majority of the cases, lack of validation of basic facts associated with plaintiffs and related claims, and the three cases tried to verdict did not inform of the many salient facts and legal issues needed for assessment of the other cases. The trials and appeals of the MDL matters can occur over the course of many years. Significant unfavorable outcomes in a number of cases in the MDL could have a material adverse effect on Chemours' consolidated financial position, results of operations or cash flows.

There could also be new lawsuits filed related to DuPont's use of PFOA, its manufacture of PFOA, or its customers use of DuPont products that may not be within the scope of the MDL Settlement. Any such new litigation could also result in Chemours incurring additional costs and liabilities. Management believes it is reasonably possible that the Company could incur losses related to other PFOA matters in excess of amounts accrued but any such losses are not estimable at this time.

(d) U.S. Smelter and Lead Refinery, Inc.

Five lawsuits, including two putative class actions, were filed against DuPont by area residents concerning the U.S. Smelter and Lead Refinery multi-party Superfund site in East Chicago, Indiana. Three of the lawsuits allege that Chemours is now responsible for DuPont environmental liabilities. The lawsuits include allegations for personal injury damages, damages under the Comprehensive Environmental Response Compensation and Liability Act ("CERCLA") and damages under the Fair Housing Act. At separation, DuPont assigned Chemours its former plant site, which is located south of the residential portion of the Superfund area, and its responsibility for the environmental remediation at the Superfund site. DuPont has requested that Chemours defend and indemnify it, and Chemours has agreed to do so under a reservation of rights. Management believes a loss is reasonably possible but not estimable at this time.

Environmental

Chemours, by virtue of its status as a subsidiary of DuPont prior to the separation, is subject to contingencies pursuant to environmental laws and regulations that in the future may require further action to correct the effects on the environment of prior disposal practices or releases of chemical substances by Chemours or other parties. Much of this liability results from CERCLA (often referred to as Superfund), the Resource Conservation and Recovery Act and similar state and global laws. These laws require Chemours to undertake certain investigative, remediation and restoration activities at sites where Chemours conducts or once conducted operations or at sites where Chemours-generated waste was disposed. The accrual also includes estimated costs related to a number of sites identified for which it is probable that environmental remediation will be required, but which are not currently the subject of enforcement activities.

At March 31, 2017 and December 31, 2016, the Consolidated Balance Sheets included a liability relating to these matters of \$279 and \$278, respectively, which, in management's opinion, is appropriate based on existing facts and circumstances. The time-frame for a site to go through all phases of remediation (investigation and active clean-up) may take about 15 to 20 years, followed by several years of on-going maintenance and monitoring ("OM&M") activities. Remediation activities, including OM&M activities, vary substantially in duration and cost from site to site. These activities, and their associated costs, depend on the mix of unique site characteristics, evolving remediation technologies, diverse regulatory requirements, as well as the presence or absence of other potentially responsible parties. In addition, for claims that Chemours may be required to indemnify DuPont pursuant to the separation-related agreements, Chemours, through DuPont, has limited available information for certain sites or is in the early stages of discussions with regulators. For these sites in particular, there may be considerable variability between the clean-up activities that

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

are currently being undertaken or planned and the ultimate actions that could be required. Therefore, considerable uncertainty exists with respect to environmental remediation costs and, under adverse changes in circumstances, although deemed remote, the potential liability may range up to approximately \$480 above the amount accrued at March 31, 2017.

For the three months ended March 31, 2017 and 2016, Chemours incurred environmental remediation expenses of \$9 and \$7, respectively.

Based on existing facts and circumstances, management does not believe that any loss, in excess of amounts accrued, related to remediation activities at any individual site will have a material impact on the Company's financial position, results of operations or cash flows at any given year, as such obligation can be satisfied or settled over many years.

Note 14. Financial Instruments

Derivative Instruments

Foreign Currency Forward Contracts

Chemours uses foreign currency forward contracts to reduce its net exposure, by currency, related to non-functional currency-denominated monetary assets and liabilities of its operations so that exchange gains and losses resulting from exchange rate changes are minimized. These derivative instruments are not part of a cash flow hedge program or a fair value hedge program, and have not been designated as a hedge. Although all of the forward contracts are subject to an enforceable master netting agreement, Chemours has elected to present the derivative assets and liabilities on a gross basis on the balance sheet. No collateral has been required for these contracts. All gains and losses resulting from the revaluation of the derivative assets and liabilities are recognized in "other income, net" in the statements of operations during the period in which they occurred.

At March 31, 2017, there were 21 foreign currency forward contracts outstanding with an aggregate gross notional value of \$377. Chemours recognized in "Other income, net" of the Interim Consolidated Statements of Operations net loss of \$1 and \$1 for the three months ended March 31, 2017, and 2016, respectively.

Net Investment Hedge - Foreign Currency Borrowings

Chemours designated its Euro senior unsecured notes ("Euro Notes") as a hedge of its net investments in certain of its international subsidiaries that use the Euro as functional currency in order to reduce the volatility in stockholders' equity caused by the changes in foreign currency exchange rates of the Euro with respect to the U.S. Dollar. Chemours uses the spot method to measure the effectiveness of the net investment hedge. Under this method, for each reporting period, the change in the carrying value of the Euro Notes due to remeasurement of the effective portion is reported in accumulated other comprehensive income on the balance sheet and the remaining change in the carrying value of the ineffective portion, if any, is recognized in "other income, net" in the statements of operations. Chemours evaluates the effectiveness of its net investment hedge quarterly. Chemours did not record any ineffectiveness for the three months ended March 31, 2017 and 2016. The Company recognized a loss of \$10 and \$7 for the three months ended March 31, 2017 and 2016, respectively, on its net investment hedges in accumulated other comprehensive income (loss) ("AOCI").

Fair Value of Derivative Instruments

The table below presents the fair value of Chemours' derivative assets and liabilities within the fair value hierarchy:

	Balance Sheet Location	Fair Value Using Level 2 Inputs	
		March 31, 2017	December 31, 2016
Asset derivatives:			
Foreign currency forward contracts	Accounts and notes receivable - trade, net	\$ 3	\$ 2
Total asset derivatives		<u>\$ 3</u>	<u>\$ 2</u>
Liability derivatives:			
Foreign currency forward contracts	Other accrued liabilities	\$ 3	\$ 4
Total liability derivatives		<u>\$ 3</u>	<u>\$ 4</u>

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

We classify our foreign currency forward contracts as Level 2 as the valuation inputs are based on quoted prices and market observable data of similar instruments. For derivative assets and liabilities, standard industry models are used to calculate the fair value of the various financial instruments based on significant observable market inputs, such as foreign exchange rates and implied volatilities obtained from various market sources. Market inputs are obtained from well-established and recognized vendors of market data and subjected to tolerance/quality checks.

Note 15. Long-Term Employee Benefits

The components of net periodic benefit income for all significant pension plans were as follows:

	Three Months Ended March 31,	
	2017	2016
Net periodic pension cost (income):		
Service cost	\$ 4	\$ 3
Interest cost	4	5
Expected return on plan assets	(17)	(16)
Amortization of actuarial loss	5	4
Net periodic pension income	<u>\$ (4)</u>	<u>\$ (4)</u>

The net periodic benefit income is based on estimated values and an extensive use of assumptions about the discount rate, expected return on plan assets and the rate of future compensation increases received by the Company's employees.

The Company made cash contributions of \$5 to its pension plans during the three months ended March 31, 2017 and expects to make additional cash contributions of \$10 to the pension plans during the remainder of 2017.

Note 16. Stock-based Compensation

Total stock-based compensation cost included in the Interim Consolidated Statements of Operations was \$6 and \$5 for the three months ended March 31, 2017 and 2016, respectively. The income tax benefits related to stock-based compensation arrangements were \$2 for the three months ended March 31, 2017 and 2016.

The Chemours Company Equity and Incentive Plan (the "Prior Plan") and The Chemours Company 2017 Equity and Incentive Plan (the "2017 Plan") provide for grants to certain employees, independent contractors, or non-employee directors of the Company of different forms of awards, including stock options, restricted stock units (RSUs) and performance share units (PSUs). The Prior Plan provided for DuPont equity awards that converted into new Chemours equity awards at the separation date. The Prior Plan also had a maximum shares reserve of 13,500,000 for the grant of equity awards. As of March 31, 2017, 6,557,857 shares of equity and incentive plan reserve were still available for grants under the Prior Plan. On April 26, 2017, stockholders approved the 2017 Plan. As a result, no further grants will be made under the Prior Plan. A total of 19,000,000 shares of Company common stock may be subject to awards granted under the 2017 Plan, less one share for every one share that was subject to an option or stock appreciation right granted after December 31, 2016 under the Prior Plan, and 1.5 shares for every one share that was subject to an award other than an option or stock appreciation right granted after December 31, 2016 under the Prior Plan. Any shares that are subject to options or stock appreciation rights will be counted against this limit as one share for every one share granted, and any shares that are subject to awards other than options or stock appreciation rights will be counted against this limit as 1.5 shares for every one share granted. Awards that were outstanding under the Prior Plan remain outstanding under the Prior Plan in accordance with their terms. Shares underlying awards granted under the Prior Plan after December 31, 2016 that are forfeited, cancelled or that otherwise do not result in the issuance of shares, will be available for issuance under the 2017 Plan. 17,475,808 shares of equity and incentive plan reserve are available for grants under the 2017 Plan.

The Chemours Compensation Committee determines the long-term incentive mix, including stock options, RSUs and PSUs, and may authorize new grants annually.

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

Stock Options

Chemours granted non-qualified options to certain of its employees, which will serially vest over a three-year period and expire 10 years from the date of grant. The expense related to stock options granted in the three months ended March 31, 2017 was based on the weighted-average assumptions shown in the table below:

	Three Months Ended March 31, 2017
Risk-free interest rate	2.14%
Expected term (years)	6.00
Volatility	44.49%
Dividend yield	0.35%
Fair value per stock option	\$ 15.16

The Company determined the dividend yield by dividing the expected annual dividend on the Company's stock by the option exercise price. A historical daily measurement of volatility is determined based on the average volatility of peer companies adjusted for the Company's debt leverage. The risk-free interest rate is determined by reference to the yield on an outstanding U.S. Treasury note with a term equal to the expected life of the option granted. Expected life is determined using a simplified approach, calculated as the midpoint between the vesting period and the contractual life of the award.

The following table summarizes Chemours stock option activity for the three months ended March 31, 2017.

	Number of Shares (in thousands)	Weighted Average Exercise Price (per share)	Weighted Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (in thousands)
Outstanding, December 31, 2016	7,969	\$ 13.72	5.08	\$ 66,668
Granted	676	34.72		
Exercised	(1,382)	14.32		
Forfeited	—	—		
Expired	(9)	9.45		
Outstanding, March 31, 2017	<u>7,254</u>	<u>\$ 15.58</u>	<u>5.64</u>	<u>\$ 166,306</u>
Exercisable, March 31, 2017	<u>4,302</u>	<u>\$ 14.50</u>	<u>4.02</u>	<u>\$ 103,241</u>

The aggregate intrinsic values in the table above represent the total pre-tax intrinsic value (the difference between the Company's closing stock price on the last trading day at end of quarter and the exercise price, multiplied by the number of in-the-money options) that would have been received by the option holders had all option holders exercised their in-the-money options at quarter end. The amount changes based on the fair market value of the Company's stock. In 2016, total intrinsic value of options exercised for the year was approximately \$7. Total intrinsic value of options exercised for the three months ended March 31, 2017 was \$24.

As of March 31, 2017, \$12 of total unrecognized compensation cost related to stock options is expected to be recognized over a weighted-average period of 2.58 years.

RSUs

Chemours granted RSUs to key management employees that generally vest over a three-year period and, upon vesting, convert one-for-one to Chemours common stock. The fair value of all stock-settled RSUs is based upon the market price of the underlying common stock as of the grant date.

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

Non-vested awards of RSUs, both with and without a performance condition, as of March 31, 2017 are shown below.

	Number of Shares (in thousands)	Weighted Average Grant Date Fair Value (per share)
Nonvested, December 31, 2016	2,316	\$ 11.23
Granted	161	34.72
Vested	(564)	12.03
Forfeited	(10)	13.75
Nonvested, March 31, 2017	<u>1,903</u>	<u>\$ 12.96</u>

As of March 31, 2017, there was \$14 of unrecognized stock-based compensation expense related to nonvested awards, which is expected to be recognized over a weighted-average period of 1.78 years.

PSUs

Chemours issued PSUs to key senior management employees which, upon vesting, convert one-for-one to Chemours' common stock if specified performance goals, including certain market-based conditions, are met over the three year performance period specified in the grant, subject to exceptions through the respective vesting period of three years. Each grantee is granted a target award of PSUs, and may earn between 0% and 200% of the target amount depending on the Company's performance against the performance goals. During the three months ended March 31, 2017 and 2016, the Company recorded stock-based compensation related to PSUs as a component of selling, general and administrative expense of approximately \$1 and less than \$1, respectively.

The following table provides compensation costs for stock-based compensation related to PSUs at 100% of target amounts:

	Number of Shares (in thousands)	Weighted Average Grant Date Fair Value (per share)
Nonvested, December 31, 2016	803	\$ 6.10
Granted	202	39.85
Vested	—	—
Forfeited	—	—
Nonvested, March 31, 2017	<u>1,005</u>	<u>\$ 14.41</u>

A portion of the fair value of PSUs was estimated at the grant date based on the probability of satisfying the market-based conditions associated with the PSUs using the Monte Carlo valuation method, which assesses probabilities of various outcomes of market conditions. The other portion of the fair value of the PSUs is based on the fair market value of the Company's stock at the grant date, regardless of whether the market-based condition is satisfied. The per unit weighted-average fair value at the date of grant for PSUs granted during the period ended March 31, 2017 was \$39.85. The fair value of each PSU grant is amortized monthly into compensation expense based on their respective vesting conditions over three annual measurement periods. The accrual of compensation costs is based on our estimate of the final expected value of the award, and is adjusted as required for the portion based on the performance-based condition. The Company assumes that forfeitures will be minimal, and recognizes forfeitures as they occur, which results in a reduction in compensation expense. As the payout of PSUs includes dividend equivalents, no separate dividend yield assumption is required in calculating the fair value of the PSUs.

As of March 31, 2017, based on the Company's assessment of its performance goals for 2016, approximately 200,000 additional shares may be awarded under the 2016 grant awards.

Note 17. Segment Information

Chemours' operations are classified into three reportable segments based on similar economic characteristics, the nature of products and production processes, end-use markets, channels of distribution and regulatory environment. Chemours' reportable segments are

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

Titanium Technologies, Fluoroproducts and Chemical Solutions. Corporate costs and certain legal and environmental expenses that are not aligned with the reportable segments and foreign exchange gains and losses are reflected in Corporate and Other.

Segment sales include transfers to another reportable segment. Certain products are transferred between segments on a basis intended to reflect, as nearly as practicable, the market value of the products. These product transfers were limited and were not significant for each of the periods presented. Depreciation and amortization includes depreciation on research and development facilities and amortization of other intangible assets, excluding write-down of assets.

Adjusted Earnings Before Interest, Taxes, Depreciation and Amortization (“Adjusted EBITDA”) is the primary measure of segment profitability used by the Chief Operating Decision Maker and is defined as income before income taxes excluding the following:

- interest expense, depreciation and amortization,
- non-operating pension and other postretirement employee benefit costs, which represent the components of net periodic pension costs (income) excluding service cost component,
- exchange losses (gains) included in “other income, net” of the statement of operations,
- restructuring, asset-related charges and other charges, net,
- asset impairments,
- losses (gains) on sale of business or assets, and
- other items not considered indicative of our ongoing operational performance and expected to occur infrequently.

Three Months Ended March 31,	Titanium Technologies	Fluoroproducts	Chemical Solutions	Corporate and Other	Total
2017					
Net sales to external customers	\$ 646	\$ 652	\$ 139	\$ —	\$ 1,437
Adjusted EBITDA	159	155	12	(41)	285
Depreciation and amortization	33	26	4	8	71
2016					
Net sales to external customers	\$ 521	\$ 531	\$ 245	\$ —	\$ 1,297
Adjusted EBITDA	54	85	10	(21)	128
Depreciation and amortization	22	24	11	9	66

The following is a tabular reconciliation of consolidated income before income taxes to Adjusted EBITDA:

	Three Months Ended March 31,	
	2017	2016
Income before income taxes	\$ 173	\$ 70
Interest expense, net	51	57
Depreciation and amortization	71	66
Non-operating pension and other postretirement employee benefit income	(8)	(7)
Exchange (gains) losses	(5)	6
Restructuring charges	12	17
Gain on sale of assets and businesses	(16)	(89)
Transaction costs ¹	—	3
Legal and other charges ²	7	5
Adjusted EBITDA	<u>\$ 285</u>	<u>\$ 128</u>

¹ Includes accounting, legal and bankers transaction fees incurred related to the Company's strategic initiatives.

² Includes litigation settlements, water treatment accruals related to PFOA, and lease termination charges.

Note 18. Guarantor Condensed Consolidating Financial Information

The following guarantor financial information is included in accordance with Rule 3-10 of Regulation S-X (Rule 3-10) in connection with the issuance of the Notes by The Chemours Company (the “Parent Issuer”). The Notes are fully and unconditionally guaranteed,

The Chemours Company
Notes to the Interim Consolidated Financial Statements (Unaudited)
(Dollars in millions, except per share amounts)

jointly and severally, on a senior unsecured unsubordinated basis, in each case, subject to certain exceptions, by the Parent Issuer and by certain subsidiaries (together, the “Guarantor Subsidiaries”). Each of the Guarantor Subsidiaries is 100% owned by the Company. No other subsidiaries of the Company, either direct or indirect, guarantee the Notes (together, the “Non-Guarantor Subsidiaries”). The Guarantor Subsidiaries, excluding the Parent Issuer, will be automatically released from those guarantees upon the occurrence of certain customary release provisions.

The following condensed consolidating financial information is presented to comply with the Company’s requirements under Rule 3-10:

- the Consolidating Statements of Comprehensive Income (Loss) for the three ended March 31, 2017 and 2016;
- the Consolidating Balance Sheets as of March 31, 2017 and December 31, 2016; and
- the Consolidating Statements of Cash Flows for the three months ended March 31, 2017 and 2016.

The condensed consolidating financial information is presented using the equity method of accounting for the Company’s investments in 100% owned subsidiaries. Under the equity method, the investments in subsidiaries are recorded at cost and adjusted for our share of the subsidiaries cumulative results of operations, capital contributions, distributions and other equity changes. The elimination entries principally eliminate investments in subsidiaries and intercompany balances and transactions. The financial information in this footnote should be read in conjunction with the interim consolidated financial statements presented and other notes related thereto contained in this Quarterly Report.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Introduction

Management's discussion and analysis, which we refer to as "MD&A", of our results of operations and financial condition supplements the unaudited interim consolidated financial statements and related notes included elsewhere herein to help provide an understanding of our financial condition, changes in financial condition and results of our operations. The discussion and analysis presented below refer to and should be read in conjunction with the unaudited interim consolidated financial statements and the related notes included elsewhere in this Quarterly Report on Form 10-Q, as well as our audited consolidated financial statements and the related notes included in the Annual Report on Form 10-K for the year ended December 31, 2016.

Unless the context otherwise requires, references herein to "The Chemours Company", "Chemours", "the Company", "our company", "we", "us", and "our" refer to The Chemours Company and its consolidated subsidiaries. References herein to "DuPont" refer to E.I. du Pont de Nemours and Company, a Delaware corporation, and its consolidated subsidiaries (other than Chemours and its consolidated subsidiaries), unless the context otherwise requires.

Forward-Looking Statements

This section and other parts of this Quarterly Report on Form 10-Q contain forward-looking statements, within the meaning of the federal securities law, that involve risks and uncertainties. Forward-looking statements provide current expectations of future events based on certain assumptions and include any statement that does not directly relate to any historical or current fact. The words "believe", "expect", "anticipate", "plan", "estimate", "target", "project" and similar expressions, among others, generally identify "forward-looking statements", which speak only as of the date the statements were made.

Forward-looking statements are based on certain assumptions and expectations of future events which may not be accurate or realized. Forward-looking statements also involve risks and uncertainties, many of which are beyond Chemours' control. Additionally, there may be other risks and uncertainties that we are unable to identify at this time or that we do not currently expect to have a material impact on our business. The matters discussed in these forward-looking statements are subject to risks, uncertainties and other factors that could cause actual results to differ materially from those set forth in the forward-looking statements. Factors that could cause or contribute to these differences include those discussed in the "Forward-Looking Statements" and the "Risk Factors" sections in our Annual Report on Form 10-K for the year ended December 31, 2016. The Company assumes no obligation to revise or update any forward-looking statement for any reason, except as required by law.

Overview

Chemours is a leading global provider of performance chemicals that are key inputs in end-products and processes in a variety of industries. We deliver customized solutions with a wide range of industrial and specialty chemical products for markets including plastics and coatings, refrigeration and air conditioning, general industrial and mining. Principal products include titanium dioxide ("TiO₂"), refrigerants, industrial fluoropolymer resins, sodium cyanide and performance chemicals and intermediates.

Chemours manages and reports operating results through three reportable segments: Titanium Technologies, Fluoroproducts and Chemical Solutions. Our position with each of these businesses reflects the strong value proposition we provide to our customers based on our long history and reputation in the chemical industry for safety, quality and reliability.

Transformation Plan

After the separation in 2015, Chemours announced a plan to transform the company by reducing structural costs, growing market positions, optimizing its portfolio, refocusing investments, and enhancing its organization. Chemours expects the transformation plan to deliver \$500 million of incremental Adjusted EBITDA improvement over 2015 through 2017 based on our anticipated cost reduction and growth initiatives. We expect cost savings of approximately \$350 million and approximately \$150 million in improvements from growth initiatives will also improve our pre-tax earnings by similar amounts. Through year-end 2016, we realized approximately \$200 million in cost savings, and we continue to implement additional cost reduction initiatives in order to realize our target additional structural costs savings of approximately \$150 million, about half of which are expected to be realized in 2018. These improvements will be partially offset by the impact of divestitures completed during 2016, unfavorable price and mix of fluoropolymer products, and may also be impacted by market factors. Results of our transformation actions are further discussed in the Results of Operations, Segment Reviews and Outlook sections of this MD&A and in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

Recent Developments

In April 2017, we entered into an amendment to our existing credit agreement to provide new class of term loans denominated in Euros and dollars, in an aggregate principal amount of €400 million and \$940 million, respectively. The proceeds from the new class of term loans were used to repay in full the existing senior secured term loan outstanding as of March 31, 2017 of approximately \$1,369 million. No incremental debt was issued as a result of the amendment. Details of the amendment are discussed further in the “Credit Facilities and Notes” section of this MD&A.

Also, in April 2017, we completed the sale of our corporate headquarters building located in Wilmington, Delaware for gross proceeds of \$32 million. We will use the net proceeds from this sale to repay portion of our outstanding term loans in accordance with the credit agreement, as amended. Also, in connection with the sale, we entered into lease agreements to leaseback portion of the building beginning in April 2017. No significant gain or loss from the sale and leaseback transaction is expected to be recognized.

Our First Quarter 2017 Results and Business Highlights

Net sales for the three months ended March 31, 2017 were \$1.4 billion, an increase of 11% from \$1.3 billion for the three months ended March 31, 2016. We recognized net income attributable to Chemours of \$150 million and \$51 million for the three months ended March 31, 2017 and 2016, respectively. Our Adjusted EBITDA was \$285 million and \$128 million for the three months ended March 31, 2017 and 2016, respectively. Our results for the quarter reflect improved TiO₂ pricing and volume increases, and strong demand for Opteon™, partially offset by portfolio changes in the Chemical Solutions segment.

Results of Operations

<i>(Dollars in millions)</i>	Three Months Ended March 31,	
	2017	2016
Net sales	\$ 1,437	\$ 1,297
Cost of goods sold	1,079	1,095

Equity in earnings of affiliates	7	5
Interest expense, net	(51)	(57)
Other income, net	34	93
Income before income taxes	173	70
Provision for income taxes	22	19
Net income	151	51
Less: Net income attributable to noncontrolling interests	1	—
Net income attributable to Chemours	\$ 150	\$ 51

Net Sales

Net sales for the three months ended March 31, 2017 were \$1.4 billion, an increase of approximately 11% compared to \$1.3 billion in the same period in 2016. The increase in net sales for the three months ended March 31, 2017 was driven by volume increases in the Titanium Technologies and Fluoroproducts segments of approximately 15%, and price improvements in TiO₂ contributed to an approximately 5% increase in net sales. These increases were partially offset by portfolio changes in the Chemicals Solutions segment and approximately 1% unfavorable foreign currency impact.

The table below shows the impact of price, volume, currency and portfolio changes on net sales for the three months ended March 31, 2017 compared with the three months ended March 31, 2016:

Change in net sales from prior period	Three Months Ended March 31, 2017
Price	5%
Volume	15%
Currency	(1)%
Portfolio / Other	(8)%
Total Change	11%

For a detailed discussion of net sales, see the Segment Reviews section of this MD&A.

Cost of goods sold

Cost of goods sold (COGS) decreased by 1% for the three months ended March 31, 2017 when compared to the same period in 2016, primarily driven by portfolio changes in our Chemical Solutions segment which decreased COGS by approximately 9%, partially offset by sales volume increases in line with sales increases in the first quarter of 2017.

Selling, general and administrative expense

Selling, general and administrative (SG&A) expense increased by 8% to \$144 million for the three months ended March 31, 2017 from \$133 million for the three months ended March 31, 2016. Increase in SG&A was due to higher accrual related to performance related compensation by approximately \$6 million, additional water treatment accruals related to PFOA of approximately \$3 million and higher legal costs incurred in connection with the PFOA MDL settlement.

Research and development expense

Research and development (R&D) expense decreased by \$4 million to \$19 million for the three months ended March 31, 2017 from \$23 million for the three months ended March 31, 2016. The decrease in R&D expense was driven by decisions to focus on fewer, higher return projects.

Restructuring and asset-related charges, net

We recorded pre-tax charges of approximately \$12 million for employee separation, decommissioning and other asset-related charges for the three months ended March 31, 2017 compared to \$17 million for the three months ended March 31, 2016.

Charges for the three months ended March 31, 2017 consist primarily of decommissioning and dismantling activities related to the closure of the Edge Moor manufacturing plant in the Titanium Technologies segment of approximately \$4 million, closure of certain production lines in the Fluoroproducts segment of approximately \$3 million, and closure of reactive metals solution (“RMS”) manufacturing plant in the Chemical Solutions segment of approximately \$5 million.

Charges for the three months ended March 31, 2016 consist primarily of \$8 million related to our Edge Moor manufacturing plant decommissioning and dismantling activities in our Titanium Technologies segment and \$4 million related to decommissioning activities of certain production lines in our Fluoroproducts segment. We also incurred an additional \$4 million of employee separation costs due to continued efforts to streamline and simplify our organizational structure and to reduce costs.

For details related to “Restructuring and asset-related charges, net”, see Note 3 to the Interim Consolidated Financial Statements.

Interest expense, net

We incurred interest expense of \$51 million for the three months ended March 31, 2017 compared to \$57 million for the three months ended March 31, 2016. Interest expense decreased by approximately \$6 million for the three months ended March 31, 2017 due to lower outstanding debt principal as a result of debt repurchases and repayments that occurred from mid-2016 through year-end. In addition, interest expense for the three months ended March 31, 2016 includes approximately \$4 million of non-cash write-off of unamortized debt issuance costs attributable to the reduction in our revolver commitment, which did not recur in 2017. These decreases were slightly offset by lower capitalized interest in the three months ended March 31, 2017 versus the three months ended March 31, 2016 due to our Altamira plant expansion that was completed in the second of quarter of 2016.

Other income, net

Other income, net decreased by \$59 million to \$34 million for the three months ended March 31, 2017 from \$93 million for the three months ended March 31, 2016. The decrease was primarily due to \$89 million of gain recognized from the sale of our aniline facility in Beaumont, Texas to Dow in the first quarter of 2016 that did not recur in 2017, partially offset by a \$16 million gain on sale

The Chemours Company

recognized in the first quarter of 2017 primarily related to the sale of the Edge Moor site and other asset sales. In addition, other income primarily includes foreign currency exchange gain of \$5 million in the first quarter of 2017 compared to foreign currency exchange losses of \$6 million in 2016, which was mainly driven by weakening of the U.S. dollar against Mexican peso during the first quarter of 2017.

For additional details on other income, net and foreign currency forward contracts, see Note 4 and Note 14 to the Interim Consolidated Financial Statements, respectively.

Provision for income taxes

For the three months ended March 31, 2017 and 2016, Chemours recorded a provision for income tax of \$22 and \$19, respectively, resulting in an effective income tax rate of approximately 13% and 27%, respectively. The income tax provision for the three months ended March 31, 2017 is inclusive of a \$10 income tax benefit from stock option windfalls. The income tax provision for the three months ended March 31, 2016 is inclusive of \$34 income tax expense related to fixed asset sales that took place during the quarter. The remaining change in the effective tax rate from the prior year is primarily due to the Company's geographical mix of earnings as well as the impact of the additional valuation allowance on U.S. foreign tax credits of approximately \$5 million during the first quarter of 2017, from which the Company does not expect to benefit in 2017.

Segment Reviews

The following table represents Chemours' total consolidated Adjusted EBITDA by segment:

<i>(Dollars in millions)</i>	Three Months Ended March 31,	
	2017	2016
Titanium Technologies	\$ 159	\$ 54
Fluoroproducts	155	85
Chemical Solutions	12	10
Corporate and Other	(41)	(21)
Total	\$ 285	\$ 128

Corporate costs and certain legal and environmental expenses that are not allocated to the segments are reflected in Corporate and Other. The increase in Corporate and Other costs primarily relates to higher performance-related compensation expense and higher legal costs incurred in connection with the PFOA MDL settlement.

Adjusted EBITDA represents our primary measure of segment performance and is defined as income before income taxes excluding the following:

- interest expense, depreciation and amortization,
- non-operating pension and other postretirement employee benefit costs, which represent the component of net periodic pension costs (income) excluding service cost component,
- exchange losses (gains) included in "other income, net" of the statement of operations,
- restructuring, asset-related charges and other charges, net,
- asset impairments,
- losses (gains) on sale of business or assets, and
- other items not considered indicative of our ongoing operational performance and expected to occur infrequently.

A reconciliation of Adjusted EBITDA to net income for the three months ended March 31, 2017 and 2016 is included in the Non-GAAP Financial Measures in this Item 2 and in Note 17 to the Interim Consolidated Financial Statements.

Titanium Technologies

<i>(Dollars in millions)</i>	Three Months Ended March 31,	
	2017	2016
Segment Net Sales	\$ 646	\$ 521
Adjusted EBITDA	159	54
Adjusted EBITDA Margin	25%	10%

The Chemours Company

Change in segment net sales from prior period	Three Months Ended	
	March 31, 2017	
Price		14%
Volume		11%
Currency		(1)%
Portfolio / Other		—%
Total Change		24%

Segment Net Sales: Net sales increased by 24% for the three months ended March 31, 2017 when compared with the same period in 2016. The increase in net sales was primarily due to improvement in global average selling prices from 2016 through 2017 and volume increase. The global average selling price of our TiO₂ in the first quarter of 2017 is approximately 12% higher than the global average selling price in the first quarter of 2016. Our TiO₂ sales volume also increased in the first quarter by approximately 13% due to the higher demand and tight supply in all regions. Unfavorable foreign currency impact, primarily due to strengthening of U.S. dollar against the Euro, contributed to 1% decrease in net sales.

Adjusted EBITDA and Adjusted EBITDA margin: Adjusted EBITDA and Adjusted EBITDA margin increased by \$105 million (or 194%) and 15%, respectively, during the three months ended March 31, 2017 when compared to the same period in 2016. These increases were primarily driven by selling price and volume increases, which increased Adjusted EBITDA by approximately 178%. Production efficiency improvements also contributed to increase in Adjusted EBITDA by approximately 30%. These increases were partially offset by unfavorable foreign currency impact of approximately 10% primarily due to strengthening of U.S. dollar against the Euro.

Fluoroproducts

(Dollars in millions)	Three Months Ended March 31,	
	2017	2016
Segment Net Sales	\$ 652	\$ 531
Adjusted EBITDA	155	85
Adjusted EBITDA Margin	24%	16%

Change in segment net sales from prior period	Three Months Ended	
	March 31, 2017	
Price		(1)%
Volume		24%
Currency		—%
Portfolio / Other		—%
Total Change		23%

Segment Net Sales: Net sales increased by 23% for the three months ended March 31, 2017 in comparison with the same period in 2016. Continued strong demand for Opteon™ refrigerant in Europe and the United States delivered a significant increase in volume over the prior period along with slightly higher fluoropolymer product volume. These increases were partially offset by lower selling prices for fluoropolymer products due to competitive pricing pressures.

Adjusted EBITDA and Adjusted EBITDA margin: Adjusted EBITDA and Adjusted EBITDA margin increased by \$70 million (or 82%) and 8%, respectively, during the three months ended March 31, 2017 when compared to the same period in 2016. These increases were due primarily to strong sales demand in fluorochemicals. Margin improvement from fluorochemicals sales contributed an increase of approximately 76%. Remaining variance was contributed by higher fluoropolymer product volume, partially offset by lower price driven by unfavorable mix.

The Fluoroproducts segment continues to evaluate its cost structure to optimize the segment's profitability. It is possible that we may incur additional charges from this action.

Chemical Solutions

<i>(Dollars in millions)</i>	Three Months Ended March 31,	
	2017	2016
Segment Net Sales	\$ 139	\$ 245
Adjusted EBITDA	12	10
Adjusted EBITDA Margin	9%	4%

Change in segment net sales from prior period	Three Months Ended March 31, 2017
Price	—%
Volume	1%
Currency	—%
Portfolio / Other	(44)%
Total Change	(43)%

Segment Net Sales: Net sales decreased by 43% in the three months ended March 31, 2017 compared with the same period in 2016 primarily due to portfolio changes resulting from the sale of our aniline facility in Beaumont, Texas, our Clean & Disinfect business and our Sulfur business in 2016, which represents approximately 44% decrease net sales. This was partially offset by modest sales volume increase in our performance chemicals & intermediate products.

Adjusted EBITDA and Adjusted EBITDA margin: Adjusted EBITDA and Adjusted EBITDA margin increased by \$2 million (or 20%) and 5% in the three months ended March 31, 2017 when compared to the same period in 2016. The improvement in Adjusted EBITDA and Adjusted EBITDA margin reflect lower operating costs of approximately \$9 million from cost reduction initiatives including production shutdown at our RMS site in Niagara Falls, New York and margin improvements in our Performance Chemicals & Intermediates business. These increases were partially offset by the impacts of the divestitures.

2017 Outlook

For the remainder of the year, we continue to anticipate that the Company's performance will remain strong for both Ti-Pure™ TiO₂ and Opteon™ refrigerants. We expect to deliver full-year Adjusted EBITDA improvement, with similar pre-tax income improvement, substantially in line with our transformation goals. We are committed to delivering additional structural cost savings of approximately \$150 million and we continue to implement certain initiatives in order to realize our target cost savings, about half of which are expected to be realized in 2018. We also expect to generate positive free cash flow for the full-year 2017 excluding payments relating to the PFOA MDL settlement. Our outlook reflects our current visibility and expectations on market factors, such as currency movements, TiO₂ pricing, end-market demand and seasonality.

Liquidity & Capital Resources

Chemours' primary source of liquidity is cash generated from operations, available cash and borrowings under debt financing arrangements. We believe these sources are sufficient to fund our planned operations and to meet our interest, dividend and contractual obligations. Our financial policy seeks to deleverage by using free cash flow to repay outstanding borrowings, selectively invest for growth to enhance our portfolio including certain strategic capital investments, and return cash to shareholders through dividend payments and possible share repurchases in the future. Subject to approval, we may raise additional capital or borrowings from time to time. However, there can be no assurance that future capital or borrowings will be available to us, and that the cost and availability of new capital or borrowings could be materially impacted by market conditions.

Over the next 12 months, Chemours expects to have significant interest, capital expenditures, PFOA MDL settlement, restructuring and dividend payments. We expect to fund these payments through cash generated from operations, available cash and borrowings. We anticipate that our operations and debt financing arrangements will provide sufficient liquidity over the next 12 months. Availability under our revolving credit facility is subject to the last 12 months of our consolidated EBITDA as defined under the credit agreement.

As of March 31, 2017 and December 31, 2016, we had \$701 million and \$678 million, respectively, of cash and cash equivalents on our balance sheet held by our foreign subsidiaries, all of which is readily convertible into currencies used in our operations, including the U.S. dollar. Cash and earnings of our foreign subsidiaries are generally used to finance their operations and capital expenditures. At March 31, 2017 and December 31, 2016, management believed that sufficient liquidity was available in the United States, and it is our intention to indefinitely reinvest undistributed earnings of our foreign subsidiaries outside of the United States. No deferred tax

The Chemours Company

liabilities have been recognized with regard to the approximately \$701 million and \$678 million of cash and cash equivalents of our foreign subsidiaries as of March 31, 2017 and December 31, 2016, respectively, and undistributed earnings. The potential tax implications of the repatriation of unremitted earnings are driven by facts at the time of distribution. Therefore, it is not practicable to estimate the income tax liabilities that might be incurred if such cash and earnings were repatriated to the United States.

Cash Flows

The following table sets forth a summary of the net cash provided by (used for) operating, investing and financing activities.

<i>(Dollars in millions)</i>	Three Months Ended March 31,	
	2017	2016
Cash provided by operating activities	\$ 41	\$ 36
Cash (used for) provided by investing activities	(63)	50
Cash provided by (used for) financing activities	11	(16)

Operating Activities

Cash provided by operating activities increased by \$5 million for the three months ended March 31, 2017 when compared to the same period in 2016. First quarter of 2016 included an advance payment of \$190 million that we received from DuPont in February 2016, of which approximately \$15 million and \$166 million were outstanding as of March 31, 2017 and 2016. Excluding the advance payment in 2016, cash provided by operating activities improved significantly due to favorable increases in our operating results in the first quarter of 2017 when compared in the first quarter of 2016.

Investing Activities

Cash used for investing activities for the three months ended March 31, 2017 primarily relates to capital expenditures made during the period of approximately \$69 million. The three months ended March 31, 2016 includes \$140 million proceeds from the sale of our aniline facility in Beaumont, Texas, which did not recur in 2017, partially offset by capital expenditures during the period of \$89 million. Our capital expenditures decreased by approximately \$20 million when compared to the same period in 2016 due to lower spending primarily from the completion of our Altamira plant expansion in April 2016.

We expect our full year capital expenditures in 2017 to approach \$450 million, which is above our annual capital expenditures in 2016, primarily due to expenditures associated with our new Opteon™ plant under construction in Corpus Christi and our anticipated Mining Solutions expansion, which is expected to begin in the second half of 2017.

Financing Activities

In the first quarter of 2017, and consistent with the first quarter 2016, we had quarterly required repayments on the senior secured term loans equivalent to 1% per annum of its original principal, and also declared and paid approximately \$5 million of dividends to our shareholders, equivalent to \$0.03 per share. These were offset by cash received of approximately \$20 million from exercise of stock options during the period. No similar options were exercised in the first quarter of 2016.

In April 2017, we completed an amendment to our credit agreement that provided for new class of term loans, i.e. Dollar Term Loan of \$940 million and Euro Term Loan of €400 million. The New Term Loans replaced the existing senior secured term loan outstanding as of March 31, 2017 of approximately \$1,369 million, of which \$940 million was a made through a cashless settlement of the Dollar Term Loan issuance, and the remaining \$429 million was funded through a Euro Term Loan issuance. Details of the amendment are discussed further below in the “Credit Facilities and Notes” section of this MD&A.

Current Assets

<i>(Dollars in millions)</i>	March 31, 2017	December 31, 2016
Cash and cash equivalents	\$ 898	\$ 902
Accounts and notes receivable - trade, net	921	807
Inventories	822	767
Prepaid expenses and other	70	77
Total current assets	\$ 2,711	\$ 2,553

The Chemours Company

Accounts and notes receivable - trade, net at March 31, 2017 increased by \$114 million compared to December 31, 2016 primarily due to higher sales in the first quarter of 2017 over fourth quarter of 2016 and favorable currency translation impact of approximately \$10 million.

Inventories at March 31, 2017 increased \$55 million compared to December 31, 2016 due to inventory build for increasing sales demand, primarily in the Titanium Technologies segment, and favorable currency translation impact of approximately \$11 million.

Current Liabilities

<i>(Dollars in millions)</i>	March 31, 2017	December 31, 2016
Accounts payable	\$ 941	\$ 884
Current maturities of long-term debt	14	15
Other accrued liabilities	780	872
Total current liabilities	<u>\$ 1,735</u>	<u>\$ 1,771</u>

As of March 31, 2017, accounts payable increased by \$57 million compared to December 31, 2016 due to higher inventories and timing of payments to vendors.

Other accrued liabilities decreased by \$92 million due to utilization of DuPont prepayment of approximately \$43 million, severance payments of approximately \$12 million and payment of performance related compensation in March 2017. These increases were partially offset by approximately \$37 million increase in accrued interest due to the timing of the senior unsecured notes (the "Notes") payments which are scheduled in May and November of each year.

Credit Facilities and Notes

Our credit agreement, as amended, includes a seven-year senior secured term loan (the "Term Loan") and a five-year \$750 senior secured revolving credit facility (the "Revolving Credit Facility"). The proceeds of loans made under the Revolving Credit Facility can be used to finance capital expenditures, acquisitions, working capital needs and for other general corporate purposes. Availability under the Revolving Credit Facility is subject to certain covenant limitations. At March 31, 2017, the facility had a full borrowing capacity of \$750 million, from which we had \$123 million of letters of credit issued and outstanding under this facility.

On April 3, 2017, we completed an amendment (the "April 2017 Amendment") to our credit agreement, which provides for a new class of term loans, denominated in Euros, in an aggregate principal amount of €400 million (the "Euro Term Loan"), and a new class of term loans, denominated in dollars, in an aggregate principal amount of \$940 million (the "Dollar Term Loan", and, collectively with the Euro Term Loan, the "New Term Loans"). The New Term Loans replaced in full the existing Term Loan (the "Existing Term Loans") outstanding as of March 31, 2017 of approximately \$1,369 million. The New Term Loans mature on May 12, 2022, which is the same maturity date of the Existing Term Loans. The Euro Term Loan bears a variable interest rate equal to EURIBOR plus 2.25% subject to a EURIBOR floor of 0.75% and the Dollar Term Loan bears a variable interest rate equal to LIBOR plus 2.50% subject to a LIBOR floor of 0.00%. The April 2017 Amendment also modifies certain provisions of the credit agreement, including increasing certain incurrence limits to allow further flexibility for the Company. All other provisions, including financial covenants, remains unchanged. No incremental debt was issued as a result of the April 2017 Amendment, although the Euro Term Loan will be subject to remeasurement gains or losses. We expect to record approximately \$3 million of loss on debt extinguishment and related fees in the second quarter of 2017.

The credit agreement, as amended, contains financial covenants which, solely with respect to the revolving credit facility, require us not to exceed a maximum senior secured net leverage ratio of 3.50 to 1.00 each quarter through December 31, 2016, 3.00 to 1.00 through June 30, 2017 and further decreasing by 0.25 to 1.00 every subsequent six months to 2.00 to 1.00 by January 1, 2019 and thereafter. We are also required to maintain a minimum interest coverage ratio of 1.75 to 1.00 each quarter through June 30, 2017 and further increasing by 0.25 to 1.00 every subsequent six months to 3.00 to 1.00 by January 1, 2019 and thereafter. In addition, the credit agreement contains customary affirmative and negative covenants that, among other things, limit or restrict us and our subsidiaries' ability, subject to certain exceptions, to incur liens, merge, consolidate or sell, transfer or lease assets, make investments, pay dividends, transact with subsidiaries and incur indebtedness. The credit agreement also contains customary representations and warranties and events of default. The senior secured credit facilities and the Notes contain events of default customary for these types of financings, including cross default and cross acceleration provisions to material indebtedness of Chemours. We were in compliance with our debt covenants as of March 31, 2017.

In the event of default under the revolving credit facility, our lenders under the revolving credit facility can terminate their commitments thereunder, cease making further revolving loans and accelerate outstanding revolving loans. This would allow the lenders under the revolving credit facility to declare the outstanding term loans to be immediately due and payable and to institute

The Chemours Company

foreclosure proceedings against the collateral securing the credit facility, which could force us into bankruptcy or liquidation. Any event of default or declaration of acceleration under the credit agreement also may result in an event of default under the indenture governing the notes. Any such default, event of default or declaration of acceleration could materially and adversely affect our results of operations and financial condition. Please see the section titled “Risks Related to Our Indebtedness” of the “Risk Factors” section of our Annual Report Form 10-K for the year ended December 31, 2016 for additional detail.

For the remainder of 2017, under the April 2017 Amendment, we are required to make principal payments related to the New Term Loans of approximately \$10 million and approximately \$14 million in each year from 2018 to 2021. Debt maturities related to the New Term Loans and the Notes in 2022 and beyond will be \$3,529 million. In addition, following the end of each fiscal year commencing on the year ended December 31, 2016, we are also required to make additional principal repayments, depending on our leverage level as defined in the credit agreement, equivalent to up to 50% of excess cash flow based on certain leverage targets with stepdowns to 25% and 0% as actual leverage decreases to below the 3.00 to 1.00 leverage target. No principal repayments were required to be made in the first quarter of 2017 based upon the December 31, 2016 excess cash flow determined under the credit agreement. See Note 12 to the Interim Consolidated Financial Statements included in this Quarterly Report on Form 10-Q for additional information related to our indebtedness.

Supplier Financing

In 2015, we entered into a global paying services agreement with a financial institution. Under this agreement, the financial institution acts as the paying agent for Chemours with respect to accounts payable due to our suppliers who elect to participate in the program. The agreement allows our suppliers to sell their receivables to the financial institution at the discretion of both parties on terms that are negotiated between them. Our obligations to our suppliers, including the amounts due and scheduled payment dates, are not impacted by our suppliers’ decisions to sell their receivables under this program. At March 31, 2017, the payment instructions from Chemours were \$128 million. Pursuant to their agreement with the financial institution, certain suppliers may elect to get paid early at their discretion. The available capacity under this program can vary based on the number of investors participating in this program at any point in time.

Contractual Obligations

Information related to the Company’s contractual obligations is summarized below:

<i>(Dollars in millions)</i>	Total at	Payments Due In			
	March 31, 2017	Remainder of 2017	2018 - 2019	2020 - 2021	2022 and Beyond
Long-term debt obligations ¹	\$ 3,595	\$ 39	\$ 27	\$ 27	\$ 3,502
Interest payments on long-term debt obligations ¹	1,244	146	385	383	330
Operating leases	244	47	99	55	43
Purchase obligations ²					
Raw material obligations	1,220	73	153	144	850
Utility obligations	649	74	143	129	303
Other	110	42	55	13	0
Total purchase obligations	<u>1,979</u>	<u>189</u>	<u>351</u>	<u>286</u>	<u>1,153</u>
Other liabilities					
Workers’ compensation	34	4	15	7	8
Asset retirement obligations	43	2	2	—	39
Environmental remediation	279	68	113	51	47
Legal settlements ³	351	338	5	5	3
Employee separation costs	22	19	3	—	—
Other ⁴	51	24	4	4	19
Total other liabilities	<u>780</u>	<u>455</u>	<u>142</u>	<u>67</u>	<u>116</u>
Total contractual obligations ⁵	<u>\$ 7,842</u>	<u>\$ 876</u>	<u>\$ 1,004</u>	<u>\$ 818</u>	<u>\$ 5,144</u>

The Chemours Company

- ¹ In April 2017, the Company entered into an amendment to its credit agreement, further described in the “Credit Facilities and Notes” section of this MD&A. Principal and interest payments reflect the amended terms of the new term loans. Interest rates and foreign exchange rates reflect the prevailing rates as of March 31, 2017. No incremental debt was incurred as a result of the April 2017 Amendment, although the Euro Term Loan will be subject to remeasurement gains or losses. Also, an estimated net proceeds of approximately \$29 million, subject to customary adjustments, from the sale of our corporate headquarters building were included as principal repayment in 2017, required under the credit agreement as amended.
- ² Represents enforceable and legally binding agreements to purchase goods or services that specify fixed or minimum quantities; fixed minimum or variable price provisions; and the approximate timing of the agreement.
- ³ Includes \$335 million litigation accrual related to the PFOA MDL Settlement (see Note 13 to the Interim Consolidated Financial Statements).
- ⁴ Includes expected contributions and benefits payments in excess of plan assets to be made to fund our pension and other long-term employee benefit plans. Actual payments will depend on several factors, including investment performance and discount rates, and may also be affected by changes in applicable local requirements. See Note 22 to the Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2016 for additional information.
- ⁵ Due to uncertainty regarding the completion of tax audits and possible outcomes, we are unable to determine the timing of payments related to unrecognized tax benefits. See Note 9 to the Consolidated Financial Statements included in our Annual Report on Form 10-K for the year ended December 31, 2016 for additional information.

Off Balance Sheet Arrangements

Information with respect to Chemours’ guarantees is included Note 20 to the Consolidated Financial Statements in the Annual Report on Form 10-K for the year ended December 31, 2016. Historically, Chemours has not made significant payments to satisfy guarantee obligations; however, Chemours believes it has the financial resources to satisfy these guarantees in the event required. Remaining guarantees outstanding as of March 31, 2017 was insignificant.

Critical Accounting Policies and Estimates

Chemours’ significant accounting policies are described in “Management’s Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Estimates” and Note 3 to the Consolidated Financial Statements in our Annual Report on Form 10-K. There have been no material changes to our critical accounting policies and estimates previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2016.

Recent Accounting Pronouncements

See Note 2 to the Interim Consolidated Financial Statements included in this Quarterly Report on Form 10-Q for discussions of recent accounting pronouncements.

Environmental Matters

Consistent with our Chemours values and our Environment, Health and Safety (EHS) Policy, Chemours is committed to preventing releases to the environment at our manufacturing sites to keep our people and communities safe and to be good stewards of the environment. Chemours is also subject to environmental laws and regulations relating to the protection of the environment. We believe that, as a general matter, our policies, standards and procedures are properly designed to prevent unreasonable risk of harm to people and the environment, and that our handling, manufacture, use and disposal of hazardous substances are in accordance with applicable environmental laws and regulations.

Environmental Remediation

Mainly because of past operations, operations of predecessor companies or past disposal practices, we, like many other similar companies, have clean-up responsibilities, associated remediation costs and are subject to claims by other parties, including claims for matters that are liabilities of DuPont and its subsidiaries that Chemours may be required to indemnify pursuant to the separation-related agreements executed prior to the separation.

Our environmental reserve includes estimated costs related to a number of sites for which it is probable that environmental remediation will be required, whether or not subject to enforcement activities, as well as those obligations that result from environmental laws such as the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA, often referred to as Superfund), the Resource Conservation and Recovery Act (RCRA) and similar state, federal and foreign laws. These laws require certain investigative, remediation and restoration activities at sites where Chemours conducts or once conducted operations or at sites where Chemours-generated waste was disposed. At March 31, 2017 and December 31, 2016, we recorded environmental remediation accruals of \$279 and \$278 million, respectively, which, in management’s opinion, is appropriate based on existing facts and circumstances.

Our remediation portfolio is relatively mature, with many of our sites under active clean-up moving towards final completion. As remediation efforts progress, sites move from the investigation phase (Investigation) to the active clean-up phase, and as construction

The Chemours Company

is completed at active clean-ups (Active Remediation), those sites move to the ongoing maintenance and monitoring (OM&M) or closure phase. As final clean-ups for some significant sites are completed over the next several years, we expect our annual expenses related to these active sites to decline over time. The time-frame for a site to go through all phases of remediation (investigation and active clean-up) may take about 15 to 20 years, followed by several years of OM&M activities. Remediation activities, including OM&M activities, vary substantially in duration and cost from site to site. These activities, and their associated costs, depend on the mix of unique site characteristics, evolving remediation technologies, diverse regulatory requirements, as well as the presence or absence of other potentially responsible parties. In addition, for claims that Chemours may be required to indemnify DuPont pursuant to the separation-related agreements, Chemours, through DuPont, has limited available information for certain sites or is in the early stages of discussions with regulators. For these sites in particular, there may be considerable variability between the clean-up activities that are currently being undertaken or planned and the ultimate actions that could be required. Therefore, considerable uncertainty exists with respect to environmental remediation costs and, under adverse changes in circumstances, although deemed remote, the potential liability may range up to approximately \$480 million above the amount accrued at March 31, 2017. In general, uncertainty is greatest and the range of potential liability is widest in the investigation phase, and narrows over time as regulatory agencies approve site remedial plans, uncertainty is reduced and, ultimately, sites move into OM&M, where needed. As more sites advance from investigation to active clean-up to OM&M or closure, the upper end of the range of potential liability is expected to decrease over time.

Some remediation sites will achieve site closure and will require no further action to protect people and the environment and comply with laws and regulations. At certain sites, we expect that there will continue to be some level of remediation activity due to ongoing monitoring and/or operations & maintenance of remedial systems. In addition, portfolio changes such as an acquisition or divestiture or notification as a potentially responsible party for a multi-party Superfund site could result in additional remediation activity and potentially additional accrual.

Management does not believe that any loss, in excess of amounts accrued, related to remediation activities at any individual site will have a material impact on our financial position, results of operations or cash flows in any given year, as such obligation can be satisfied or settled over many years. For additional information, refer to the Environmental Matters section of Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on Form 10-K for the year ended December 31, 2016.

While there are many remediation sites that contribute to the total environmental remediation accrual, the following sites are among the most significant:

<i>(Dollars in millions)</i>	March 31, 2017	December 31, 2016
Beaumont, Texas	\$ 12	\$ 12
Chambers Works, New Jersey	24	24
East Chicago, Indiana	20	20
Pompton Lakes, New Jersey	76	77
USS Lead, East Chicago, Indiana	24	21
All Other Sites	123	124
Balance at December 31	\$ 279	\$ 278

The five sites listed above represent more than 50% of our reserve and we expect to spend, in aggregate, approximately \$104 million over the next three years. For all other sites, we expect to spend approximately \$71 million over the next three years.

Beaumont Works, Beaumont, Texas

Beaumont Works began operations in 1954 in Beaumont, Jefferson County, Texas. Over the years, Beaumont Works has produced a number of basic chemicals and elastomer products including acrylonitrile, ammonia, methanol, methyl methacrylate, caprolactam, Hypalon® synthetic rubber, Nordel® hydrocarbon rubber and blended tetraethyl lead with halo-carbon solvent/stabilizers. As of March 31, 2017, with sale of the aniline production unit to Dow in 2016, Chemours has no on-going manufacturing operations on the site. Dow and Lucite remain as long-term manufacturing tenants.

As site owner, Chemours remains responsible for remediation of historical chemical releases from past operations and is conducting this work under a RCRA hazardous waste post-closure permit and Compliance Plan (CP) issued by the State of Texas. The hazardous waste permit includes provisions to manage wastes and to investigate and mitigate releases. The CP is a component of the permit and includes mitigation and monitoring requirements, including a groundwater remediation system that was installed in 1991 to control chemical migration and protect adjacent water bodies. In addition, several solid waste management unit closures have been conducted

The Chemours Company

and areas of past release addressed through interim measures to protect people and the environment. Over the years, extensive site studies have been completed and a final investigation report (Affected Property Assessment Report, or APAR, under the Texas Risk Reduction Program) for the entire site was approved by the State in 2014. Chemours has recently completed a remedial action plan (RAP), currently under agency review, to address all remaining historical solid waste management units and areas of concern identified in these studies, and expects to have this RAP approved in 2017.

The remediation accrual for Beaumont addresses remaining work identified in the RAP under review by the State as well as post-closure care and monitoring and on-going operation of the groundwater remediation system. A portion of the accrual also addresses an outstanding Natural Resource Damage claim by state and federal trustees directed to impacts on marshlands within the plant property.

Chambers Works, Deepwater, New Jersey

The Chambers Works complex is located on the eastern shore of the Delaware River in Deepwater, Salem County, New Jersey. The site comprises the former Carneys Point Works in the northern area and the Chambers Works manufacturing area in the southern area. Site operations began in 1892 when the former Carneys Point smokeless gunpowder plant was constructed at the northern end of Carneys Point. Site operations began in the manufacturing area around 1914 and included the manufacture of dyes, aromatics, elastomers, CFCs, and tetraethyl lead. Chemours continues to manufacture a variety of fluorochemicals and finished products at Chambers Works. In addition, three tenants operate processes at Chambers Works including steam/electricity generation, industrial gas production and the manufacture of intermediate chemicals. As a result of over 100 years of continuous industrial activity, site soils and groundwater have been impacted by chemical releases.

In response to identified groundwater contamination, a groundwater interceptor well system (IWS) was installed in 1970, which was designed to contain contaminated groundwater and restrict off-site migration. Additional remediation is being completed under a Federal RCRA Corrective Action Permit. The site has been studied extensively over the years and more than 25 remedial actions have been completed to date and engineering and institutional controls put in place to ensure protection of people and the environment.

Remaining work beyond continued operation of the IWS and groundwater monitoring includes completion of a site perimeter sheet pile barrier intended to more efficiently contain groundwater, completion of various targeted studies onsite and in adjacent water bodies to close investigation data gaps, and selection and implementation of final remedies under RCRA Corrective Action for various solid waste management units and areas of concern not yet addressed through interim measures.

East Chicago, Indiana

East Chicago is a former manufacturing facility owned by Chemours in East Chicago, Lake County, Indiana. The approximately 440-acre site is bounded to the south by the East Branch of the Grand Calumet River, to the east and north by residential and commercial areas, and to the west by industrial areas, including a former lead processing facility. The inorganic chemicals unit on site produced various chloride, ammonia, and zinc products and inorganic agricultural chemicals beginning in 1892 until 1986. Organic chemical manufacturing began in 1944, consisting primarily of chlorofluorocarbons production. Current operations, including support activities, now cover 28 acres of the Site. The remaining business was sold to W.R. Grace Company (Grace) in early 2000, and Grace operates the unit as a tenant. Approximately 172 acres of the site were never developed and are managed by The Nature Conservancy for habitat preservation.

A comprehensive evaluation of soil and groundwater conditions at the Site was performed as part of the RCRA corrective action process. Studies of historical site impacts began in 1983 in response to preliminary CERCLA actions undertaken by the U.S Environmental Protection Agency (EPA). The EPA eventually issued an Administrative Order on Consent for the Site in 1997. The order specified that remediation work be performed under RCRA Corrective Action authority. Work has proceeded under the RCRA Corrective Action process since that time.

Subsequent investigations included the preparation of initial environmental site assessments and multiple phases of investigation. In 2002, as an interim remedial measure, two 2,000-foot-long permeable reactive barrier treatment walls were installed along the northern property boundary to address migration of chemicals in groundwater. Since that time, the investigation process has been completed and approved by the EPA and work is in progress to define the final remedy for the site.

Pompton Lakes, New Jersey

During the twentieth century, blasting caps, fuses and related materials were manufactured at Pompton Lakes, Passaic County, New Jersey. Operating activities at the site were ceased in the mid-1990s. Primary contaminants in the soil and sediments are lead and mercury. Ground water contaminants include volatile organic compounds. Under the authority of the EPA and NJDEP, remedial

The Chemours Company

actions at the site are focused on investigating and cleaning up the area. Ground water monitoring at the site is on-going, and Chemours has installed and continues to install vapor mitigation systems at residences within the ground water plume. In addition, Chemours is further assessing ground water conditions. In June 2015, the EPA issued a modification to the site's RCRA permit that requires Chemours to dredge mercury contamination from a 36-acre area of the lake and remove sediment from two other areas of the lake near the shoreline. The remediation activities commenced when permits and implementation plans were approved in May 2016, and work on the lake dredging project is expected to be complete in 2018.

U.S. Smelter and Lead Refinery, Inc. (USS Lead), East Chicago, Indiana

The USS Lead Superfund Site is located in the Calumet neighborhood of East Chicago, Lake County, Indiana. The site includes the former USS Lead facility along with nearby commercial, municipal and residential areas. The primary compounds of interest are lead and arsenic which may be found in soils within the impacted area. The EPA is directing and organizing remediation on this site, and Chemours is one of a number of parties working cooperatively with the EPA on the safe and timely completion of this work. DuPont's former East Chicago manufacturing facility was located adjacent to the site, and DuPont assigned responsibility for the site to Chemours in the 2015 separation agreement.

The USS Lead site was listed on the National Priorities List (NPL) in 2009. To facilitate negotiations with potentially responsible parties, the EPA divided the residential part of the USS Lead Superfund Site into three zones, referred to as Zone 1, Zone 2, and Zone 3. The division into three zones resulted in Atlantic Richfield Co. and DuPont entering into an agreement in 2014 with the EPA and the State of Indiana to reimburse the EPA's costs to implement cleanup in Zone 1 and Zone 3. More recently in March 2017, Chemours and three other parties (Atlantic Richfield Co., DuPont, and U.S. Metals Refining Co.) entered into an administrative order of consent to reimburse the EPA's costs to clean up a portion of Zone 2. According to its website, the EPA is continuing its efforts to identify additional parties who might be potentially responsible for the USS Lead site cleanup, including the remainder of Zone 2. Once it has concluded these efforts, the EPA will engage in negotiations with all known viable and liable parties. The updated environmental accrual for USS Lead is based on the Record of Decision ("ROD") and Statement of Work currently in place for Zones 1 and 3, as well as the current estimate of Chemours' share to reimburse the EPA's Zone 2 cleanup cost under the March 2017 administrative order of consent. The EPA has announced its intent to reconsider the ROD for Zone 1 and the result of that review could increase or decrease Chemours' future obligations. In addition, there is uncertainty in the outlook for the remainder of Zone 2 given the EPA's stated objective to identify additional responsible parties.

PFOA

See discussion under "PFOA" in Note 13 to the Interim Consolidated Financial Statements included in this Quarterly Report on Form 10-Q.

Non-GAAP Financial Measures

We prepare our financial statements in accordance with U.S. GAAP. To supplement our financial information presented in accordance with U.S. GAAP, we provide the following non-GAAP financial measures, "Adjusted EBITDA", "Adjusted Net Income" and "Free Cash Flow", in order to clarify and provide investors with a better understanding of the Company's performance when analyzing changes in our underlying business between reporting periods and provide for greater transparency with respect to supplemental information used by management in its financial and operational decision making. We utilize Adjusted EBITDA as the primary measure of segment profitability used by our Chief Operating Decision Maker (CODM).

Adjusted EBITDA is defined as income before taxes excluding the following:

- interest expense, depreciation and amortization,
- non-operating pension and other postretirement employee benefit costs, which represent the components of net periodic pension costs (income) excluding service cost component,
- exchange losses (gains) included in "other income, net" of the statement of operations,
- restructuring, asset-related charges and other charges, net,
- asset impairments,
- losses (gains) on sale of business or assets, and
- other items not considered indicative of our ongoing operational performance and expected to occur infrequently.

Adjusted net income is defined as net income attributable to Chemours adjusted for items excluded from Adjusted EBITDA except interest expense, depreciation and amortization, and certain provision for (benefit from) income taxes. Free Cash Flow is defined as cash provided by (used for) operating activities less cash used for purchases of property, plant and equipment as disclosed in the Consolidated Statements of Cash Flows.

The Chemours Company

We believe the presentation of these non-GAAP financial measures, when used in conjunction with GAAP financial measures, is a useful financial analysis tool that can assist investors in assessing the Company's operating performance and underlying prospects. This analysis should not be considered in isolation or as a substitute for analysis of our results as reported under GAAP. In the future, we may incur expenses similar to those eliminated in this presentation. Our presentation of Adjusted EBITDA, Adjusted Net Income and Free Cash Flow should not be construed as an inference that our future results will be unaffected by unusual or in frequently occurring items. The non-GAAP financial measures we use may be defined differently from measures with the same or similar names used by other companies. This analysis, as well as the other information provided in this Quarterly Report on Form 10-Q, should be read in conjunction with the Company's interim financial statements and notes thereto included in this Quarterly Report, as well as the Company's consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2016.

The following table reconciles Adjusted EBITDA and Adjusted Net Income discussed above to net income attributable to Chemours for the periods presented:

<i>(Dollars in millions)</i>	Three Months Ended March 31,	
	2017	2016
Net income attributable to Chemours	\$ 150	\$ 51
Non-operating pension and other postretirement employee benefit income	(8)	(7)
Exchange (gains) losses	(5)	6
Restructuring charges	12	17
Gain on sale of assets or business	(16)	(89)
Transaction costs	—	3
Legal and other charges ¹	7	5
Provision for income taxes relating to reconciling items ²	2	25
Adjusted Net Income	142	11
Net income attributable to noncontrolling interests	1	—
Interest expense, net	51	57
Depreciation and amortization	71	66
All remaining provision for (benefit from) income taxes ²	20	(6)
Adjusted EBITDA	\$ 285	\$ 128

¹ Includes litigation settlements, water treatment accruals related to PFOA, and lease termination charges.

² Total of provision for (benefit from) income taxes reconciles to the amount reported in the Interim Consolidated Statements of Operations for the three months ended March 31, 2017 and 2016.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to changes in foreign currency exchange rates because of our global operations. As a result, we have assets, liabilities and cash flows denominated in a variety of foreign currencies. We are also exposed to changes in the prices of certain commodities that we use in production. Changes in these rates and commodity prices may have an impact on future cash flow and earnings. We manage these risks through normal operating and financing activities and, when deemed appropriate, through the use of derivative financial instruments. We do not enter into derivative financial instruments for trading or speculative purposes.

Chemours enters into foreign currency forward contracts to minimize volatility in earnings related to the foreign exchange gains and losses resulting from remeasuring monetary assets and liabilities that Chemours holds which are denominated in non-functional currencies. These derivatives are stand-alone and have not been designated as a hedge. As of March 31, 2017, we had open foreign exchange forward contracts with an aggregate notional U.S. dollar equivalent of \$377 million, the fair value of which amounted to less than \$1 million of net unrealized loss.

In a hypothetical adverse change in the market prices or rates that existed at March 31, 2017, a 10% increase in the U.S. dollar against our outstanding hedged contracts on foreign currencies, such as the Euro and Chinese yuan, at the currency exchange rates as of March 31, 2017 would increase our net loss by approximately \$4 million, while a 10% depreciation of the U.S. dollar against the same hedged currencies would decrease our net loss by approximately \$4 million.

Chemours hedges its net investment in certain European operations. Changes in the fair value of the hedge in the net investment of certain European operations are recorded in accumulated other comprehensive income (loss). For the three months ended March 31, 2017, Chemours did not record any ineffectiveness and recognized a loss of \$10 million on its net investment hedges within accumulated other comprehensive income (loss).

The Chemours Company

Chemours' risk management programs and the underlying exposure are closely correlated, such that the potential loss in value for the risk management portfolio described above would be largely offset by the change in value of the underlying exposure. See Note 14 to the Interim Consolidated Financial Statements for further information.

Additional Information

See Part II, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk", of our Annual Report on Form 10-K for the year ended December 31, 2016 for additional information on the Company's utilization of financial instruments and an analysis of the sensitivity of these instruments. There have been no material changes in the market risks previously disclosed in the Company's Annual Report on Form 10-K for the year ended December 31, 2016.

Item 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

The Company maintains disclosure controls and procedures designed to provide reasonable assurance that information required to be disclosed in the Company's reports filed or submitted under the Securities Exchange Act of 1934 (Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. These controls and procedures also provide reasonable assurance that information required to be disclosed in such reports is accumulated and communicated to management, including its Chief Executive Officer (CEO) and Chief Financial Officer (CFO), to allow timely decisions regarding required disclosures.

As of March 31, 2017, the Company's CEO and CFO, together with management, conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures as defined in Rule 13a-15(e) under the Exchange Act. Based on that evaluation, the CEO and CFO have concluded that these disclosure controls and procedures are effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

There have been no changes in the Company's internal control over financial reporting that occurred during the quarter ended March 31, 2017 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

The Company is subject to various legal proceedings, including, but not limited to, product liability, patent infringement, antitrust claims and claims for property damage or personal injury. Information regarding certain of these matters is set forth below and in Note 13 to the Interim Consolidated Financial Statements.

Litigation

PFOA: Environmental and Litigation Proceedings

For purposes of this report, the term PFOA means collectively perfluorooctanoic acid and its salts, including the ammonium salt and does not distinguish between the two forms. Information related to this and other litigation matters is included in Note 13 to the Interim Consolidated Financial Statements.

Environmental Proceedings

LaPorte Plant, LaPorte, Texas

The U.S. Environmental Protection Agency (EPA) conducted a multimedia inspection at the DuPont LaPorte facility in January 2008. DuPont, the EPA and the Department of Justice (DOJ) began discussions in the fall of 2011 relating to the management of certain materials in the facility's waste water treatment system, hazardous waste management, flare and air emissions. These negotiations continue. Chemours operates a fluoroproducts production facility at this site.

Dordrecht, Netherlands

The Company has received requests from the Labor Inspectorate (ISZW), the local environmental agency (OZHZ) and the National Institute for Public Health and the Environment (RIVM) in the Netherlands for information and documents regarding the Dordrecht

site's operations. The Company has complied with the requests. We understand that some of the requests from OZHZ are part of a preliminary investigation initiated by a public prosecutor, although we have not received notice that it intends to pursue such action.

Item 1A. RISK FACTORS

There have been no material changes to the risk factors disclosed in our Annual Report on Form 10-K for the year ended December 31, 2016.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

Item 3. DEFAULTS UPON SENIOR SECURITIES

None.

Item 4. MINE SAFETY DISCLOSURES

Information regarding mine safety and other regulatory actions at the Company's surface mine in Starke, Florida is included in Exhibit 95 to this report.

Item 5. OTHER INFORMATION

None.

Item 6. EXHIBITS

See the Exhibit Index for the exhibits filed with this Quarterly Report on Form 10-Q or incorporated by reference.

chemours.com

April 8, 2016

Paul C. Kirsch
[address redacted]

Dear Paul,

On behalf of The Chemours Company, it is a pleasure to offer you employment as the President, Fluoroproducts for Chemours. Your position will be based in Wilmington, DE. We would like to work towards a mid-May start date.

Please be advised this offer of employment is contingent upon approval by our Board of Directors. Based upon the terms of this offer of employment, your anticipated position with Chemours, and Chemours' status as a U.S. public company, you and Chemours are subject to certain requirements under U.S. federal securities laws. Accordingly, upon your acceptance of this offer of employment with Chemours, you agree to keep strictly confidential the terms of this offer of employment, you agree not disclose the identity of Chemours to your present employer until after Chemours makes a public announcement in accordance with applicable securities laws, and you (and members of your family) agree to refrain from transacting in Chemours common stock, or instructing others to do so on your behalf, until informed by Chemours that you are no longer subject to this restriction.

Annual Base Salary

Effective the day you report to work, we will pay you \$550,000.00 yearly while employed. Future pay increases will be based on your performance and approval of the compensation committee consistent with our salary policy.

Annual Incentive Plan (AIP)

You will be eligible for participation in the Annual Incentive Plan (AIP), which is typically payable in February of the following year. The target value of your AIP award is seventy-five percent (75%) of your annual base salary or \$412,500 for the year ending December 31, 2016. To receive the AIP award, you must be an employee at the end of the performance period.

Long Term Incentives (LTI)

You will be eligible to receive Long-Term Incentives (LTI) under the Chemours Equity and Incentive Plan. The grant is subject to approval by the Compensation

Committee of the Board of Directors. LTI is usually granted in February of each year. The target value of your LTI award beginning in 2017 is \$900,000. The amount of your actual award can vary depending on company performance.

For 2016, you will receive a LTI award with an estimated value of \$600,000. Forty percent (40%) of the target value, approximately \$240,000, will be granted in the form of nonqualified stock options featuring three-year equal graded vesting and a ten-year term. The exercise price of the stock options awarded will be set equal to the closing share price of Chemours common stock on the New York Stock Exchange on your first day of employment with Chemours. Sixty percent (60%) of the target value, approximately \$360,000, will be granted in the form of performance share units for the three-year performance period 2016-2018 which will cliff vest December 31, 2018 subject to the satisfaction of performance conditions. The number of performance share units awarded will be determined by dividing the target value by the closing share price of Chemours common stock on the New York Stock Exchange on your first day of employment with Chemours.

Signing Bonus

We are pleased to offer you a signing bonus of \$650,000.00. This sum is in consideration of: (1) the SAP incentive payment with an estimated value of \$200,000 otherwise payable in July 2016; and (2) unvested Henkel Cash Performance Units with an estimated value of \$450,000 also otherwise payable in July 2016. We respectfully require evidence of forfeiture be provided prior to payment. The bonus will be paid in one lump sum within sixty (60) days following the receipt of acceptable evidence. The signing bonus is taxable, and all regular payroll taxes will be withheld.

In the unlikely event that you voluntarily terminate your employment or the Company terminates your employment for cause, within 1 year of your date of hire, you agree and will be responsible for reimbursing the Company for the full signing bonus. In such a case, the balance owed will be deducted from any payment due to you at such time of termination, including salary, severance payments, bonuses, and vacation. By your signature on this employment offer, you specifically agree and authorize the Company to withhold any payments issued prior to termination of employment, if that termination occurs before 1 year of your date of hire. The signing bonus will not be considered for purposes of determining benefits under Chemours Compensation and Benefit Plans.

Long-Term Incentive Buyout

Chemours will provide you with a one-time award of time-vested Restricted Stock Units (RSU) with a grant date value of \$720,000. The number of RSUs awarded will be determined by dividing the grant date value by the closing share price of Chemours common stock on the New York Stock Exchange on your first day of employment with Chemours. This sum is in consideration of the outstanding unvested Cash Performance Units which will presumably be forfeited upon termination of employment with your current employer. As with the signing bonus, we respectfully require evidence of forfeiture be provided prior to the

award being granted. The RSU award will vest 40% on the first anniversary of the grant date, 40% on the second anniversary of the grant date, and 20% on the third anniversary of the grant date.

Nonqualified Deferred Compensation

Our nonqualified Retirement Savings Restoration Plan ("RSRP") allows for deferral of compensation (up to 6% of compensation above the IRS compensation limit) on the same basis as provided under the qualified RSP plan. The RSRP provides a Company match of 100% of the first six percent of the employee's deferral.

Further, you will be provided the opportunity to participate in the Management Deferred Compensation Plan, which permits deferral of up to 60% of Base Salary, up to 60% of AIP and up to 100% of restricted stock units and performance share units (for eligible Corporate Officers).

Deferral elections are typically taken in May of each year. An additional enrollment window is typically opened for new hires in November of each year.

Stock Ownership Guidelines

Contingent upon approval by our Board of Directors, as a Section 16 officer you will be a "Covered Executive" under The Chemours Company Stock Ownership Guidelines. Based upon your position at hire, you will have five (5) years to acquire and maintain ownership of at least three (3) times your annual base salary of Chemours common stock. Ownership levels are measured and reviewed annually.

Senior Executive Severance Plan

Contingent upon approval by our Board of Directors, as a Section 16 officer you will be eligible to participate in The Chemours Company Senior Executive Severance Plan. Based on your position at hire you will be classified as a Tier 2 Participant. In the event of a Qualifying Termination, you will be eligible to receive a lump sum Cash Payment equal to two times the Base Severance Payment (the sum of Base Salary and Target Annual Bonus), plus a pro-rated Target Annual Bonus for the calendar year in which the Date of Termination occurs, in addition to other benefits.

Benefits

Chemours offers a comprehensive, flexible benefits program that enables you to create a personalized package of benefits for you and your family. You must enroll within 31 calendar days of your hire date or you will be enrolled in the default coverage for YOU only - your dependents are not defaulted into coverage. Medical, Dental and Life Insurance elections are effective as of your date of hire. Other elections will become effective the first of the month following your enrollment. You will receive information shortly after your hire date with instructions for enrolling through [web address redacted]. This website, along with the Chemours Benefits Service Center at [phone number redacted], are

available to you for additional information and tools to help you select the right benefits programs for you and your family.

Retirement Savings Plan (RSP)

The Chemours Retirement Savings Plan (RSP) includes the following: \$1.00 matching Company contribution per \$1.00 employee contribution up to 6% of pay - for which you are immediately vested. (Pay for this purpose is generally total cash compensation, including overtime, STIP, Local Performance Based Compensation and/or Sales Incentive Compensation, if eligible and subject to pay exclusions as outlined in the Plan document.)

Holidays

Chemours provides 12 paid holidays each year. For 2016, you are eligible for all remaining Company holidays. Paid holidays must be taken in the calendar year granted. The exact dates may vary from year to year and from site to site.

Vacation

You will be provided four (4) weeks of vacation per year.

Under the Company vacation plan, you may carry a maximum of 40 hours of vacation forward to the next year, if not taken. Because additional "paid time off" must be granted outside the Company vacation plan, it cannot be carried forward to the following year if not used. Should employment with the Company cease, you will be paid for any unused vacation for which you are eligible, and, if you have taken vacation in excess of accrued vacation, it will be deducted from your final pay. However, no payment can be made for any unused "paid time off" that was granted to you.

Relocation Benefits

Domestic Relocation benefits are being offered as part of your employment package. For additional details on the relocation benefits available to you, please see the attached Policy Summary. Once you have completed the hiring process a counselor from Weichert Relocation Resources Inc., our relocation vendor, will be in touch with you to begin the process. The relocation expenses paid to you will not be considered for purposes of determining benefits under Chemours Compensation and Benefit Plans.

In addition, for up to one year from your date of hire, Chemours will reimburse you for any personal expenses incurred for the movement of household goods from Amsterdam to the United States, not to exceed \$10,000.

Relocation Repayment Agreement

By your signature on this employment offer, and in consideration of payment/advance of relocation expenses from The Chemours Company (Company) or its affiliates, and in the event that you voluntarily resign your employment from the Company, the Company terminates your employment for

cause, or you decide not to relocate after receiving relocation benefits, you hereby agree to repay the Company all relocation expenses.

If employment termination occurs within the first 12 months of your relocation, you shall pay 100% of all monies given to you, paid on your behalf, or reimbursed to you under the relocation program; or, if employment termination occurs in 13 to 24 months after your relocation, you shall repay on a pro-rated basis.

As to any relocation expenses that you become obligated to repay to the Company, you agree and authorize the Company to withhold any payments issued prior to termination of employment, including salary, severance payments, bonuses, and vacation. You agree to repay any remaining relocation expenses within 30 days following the effective date of employment termination.

You also accept responsibility for any tax liabilities, credits and/or deductions that you may incur as a result of the agreement.

Conditions of Employment

As is customary, this offer is contingent upon the following:

- Accepting the Company Employee Agreement (copy enclosed for your reference, which you will be asked to sign on your first day of employment).
- Completing a medical evaluation within 30 days prior to reporting to work. This evaluation may include a physical examination and will include a test for the presence of drugs, including marijuana, in your system. A positive test for drugs, other than prescribed for you by your physician will constitute grounds for withdrawing the offer.
- Presentation of sufficient document(s) of your choice to complete the I-9 Employment Eligibility Verification establishing your identity and employment eligibility as required by the Immigration Reform and Control Act of 1986 which makes it unlawful for an employer to hire an individual not authorized for employment in the U.S.
- Completing a background check with results that are acceptable to the Company.

Employment at the Company is at will. This means that your employment continues so long as both the Company and you agree that it should. Both the Company and you have the right to terminate the employment relationship at any time and for any or no reason.

We will need confirmation of your acceptance. As an acknowledgement of your acceptance, please sign the attached copy of this letter, scan and return to the attention of Beth Albright, Senior Vice President Human Resources, via email: [email address redacted]. If you have any questions or wish to discuss the terms

of this offer, please contact Beth Albright directly at: [phone number redacted]. We would like to have your decision no later than April 15, 2016.

We have an exciting and diverse team of exceptional people and believe you will contribute significantly as the leader of the Fluoroproducts Business. We trust the work ahead will provide you with the challenges you are seeking and anticipate your arrival to Chemours.

Sincerely,

A handwritten signature in black ink, appearing to read 'Mark Vergnano', with a stylized flourish at the end.

Mark Vergnano
President and Chief Executive Officer

I accept this offer of employment.

Paul C. Kirsch

CERTIFICATION OF CHIEF EXECUTIVE OFFICER

I, Mark P. Vergnano, certify that:

1. I have reviewed this report on Form 10-Q of The Chemours Company;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
